**PROJECT  
REALITY**  
will be cart based

Nintendo recently announced that instead of CDs, the Project Reality system set to appear at the end of '95 will be cart based. This means instant access to any part of the game, but can the huge games (up to 100Mbits) that Project Reality is currently boasting possibly fit on mere silicon? SUPER GAMER has the full inside view next issue.

# Be a winner with Wynne

News is just reaching the SUPER GAMER news module of a brand new quarterly magazine specifically for owners of the CD32. AMIGA CD32 GAMER (cool name) is 68 pages of reviews, news and features – all for Commodore's latest CD based system. Not only does this high class publication include reviews of every single CD32 game ever, there is also news of all up and coming games as well – the whole story! Heading the experienced editorial staff is Stuart Wynne, formerly editor of SUPERPRO and all-round technical genius. AMIGA CD32 GAMER is the only magazine for this new console and so if any of you have one, or know a friend who has, get them to buy AMIGA CD32 GAMER now! It's on the shelves as you read this, priced £3.99. You'd be a fool to miss it!

# Super Street Fighter DELETED?

Rumours about Capcom's sequel to the sequel of *StreetFighter II* are abound as it was revealed that it may never be released because it would be too expensive! The 32Mbit cart was recently tested at Nintendo UK, but there are fears that a game of this size could easily cost £80! Capcom officials are worried that despite the hype surrounding the coin-op at the moment, the game would not be 'economically viable.' Let's face it, *Super StreetFighter* is just the same game with more characters, or is it? The coin-op features not only new characters Fei Long, Dee Jay, T Hawk and Cammy, but it is substantially faster, features loads of new moves including the 'Super combo', and even a new super move bar that you must charge up first. All these special additions are included in the proposed Super NES version, but the decision has still to be made as to whether console players will get their hands on it. SUPER GAMER believes that with the dazzling *Mortal Kombat* on

the way in September, Capcom would be missing out on the chance of a lifetime. Without *Super StreetFighter, MK II* will crush any opposition, even outselling the first game which itself broke all the records. Are Nintendo gamers tired of countless *StreetFighter* games? Write in and tell us and we'll talk to Capcom on your behalf. Meanwhile, the latest news about the *StreetFighter* film is that Jean Claude Van Damme has been secured as one of the leading roles. The muscles from Brussels will no doubt be either Ken or Ryu (bearing a remarkable resemblance), but rumours in Capcom say that he may in fact play all the characters!

# Street Fighter II

Yes it's true! Some fool has got Simon Harris to re-mix all the *StreetFighter II* tunes and sound effects to form another chart-busting song that will drive everyone completely mad. This so-obviously-a-sad-cash-in CD features six different mixes of what is essentially a very staid and lifeless song; using the main theme tune interspersed with the occasional "fight, or Ha dou Ken". Mixes include Psycho Crusher Radio Edit, Championship Club remix and 20-bit Super Instrumental. Each of the tracks has a welcome brief bit of banter from rapper Einstein. Why produce such a record? Well, Super Marioland featuring the Ambassadors of Funk got to number eight didn't it? So some bright spark at Living Beat records thought this would be a good idea – 'fraid not. The thing is, Super Marioland was a joke song, no doubt about it, and people bought it so that smug Radio 1 DJs had to play it whether they liked it or not because it was on the "A" list – ha, ha! Other examples of this sad fascination with terribly catchy joke

records are Star Trekking by the Firm, anything by Jive Bunny, Tetris, Kinky Boots, Mr Blobby and most recently – the Doop song. How embarrassed do you feel when someone else looks at your music collection and finds one of these little ditties? Very. Now however, the joke's over and we urge anyone with a brain not to buy this infernal CD. It's annoying, worthless (unless you want to put coffee cups on it) and because there are so many *StreetFighter* nuts out there it will probably get to number one. Damn!

# ELSPA CHARTS

No-one can say the Gallup charts are predictable, as buying moods change radically month by month. Now we see *Super Mario Kart*, *Tournament Fighters* and *Aladdin* smashed from the top slots in the Super NES chart, to make way for *The Empire Strikes Back*, *NBA Jam* (of course) and *Sensible Soccer* (surprisingly) at number one! As football fever hits the Super NES – can *Sensible Soccer* possibly stay at the top for another month? A big surprise is *Winter Olympics* at number four. As you may have read on page 68, this is one of the worst game for the Super NES, but cleverly, US Gold didn't allow any magazines to review it before it hit the streets. Now we know why! Only a small shuffle in the Game Boy top three this month, with *Link's Awakening* dropping

down to two, and *Super Mario Land 2* rising to the top slot. Almost all of the games featured this month have been in the charts for some considerable months now, begging the question, what will be the next biggest thing on everyone's favourite hand-held? *Monster Max*, *Warioland*, *Jungle Book*? The only way you can find out is by reading next month's SUPER GAMER.

Got an NES? Our condolences. No really, the NES charts doesn't seem to be moving at all. Still at the top is the barely playable *TMHT* by Konami, but now *Double Dragon 3* and the excellent *Micro Machines* are moving up to topple the Turtles. Unfortunately, due to the mad price cuts on NES games, this chart is highly unreliable. Expect to see *Jungle Book* making a dent soon.

## ITCHY & SCRATCY

SUPER NES

ACCLAIM ● OUT JULY

This totally psychopathic cat and mouse are currently revelling in fame created by a mere 20 second slot allocated to them on *The Simpsons*. They have taken the *Tom & Jerry* theory on life one step further with their outrageous pranks which often involve decapitation, mutilation and explosions. It's all good fun though, and they're friends to the end really. These crazy animals are bringing their feud to the Super NES. Watch out!

## SPEED RACER

SUPER NES

ACCOLADE ● OUT MAY

Based on a cult cartoon currently sweeping through the States at the moment, this car racing game looks hot. From the early previews, the game seems to be *F-Zero* with guns. However the twist in the gameplay appears when you complete a level and the action switches to a sideways scrolling beat-'em-up section. Featuring loads of characters from the cartoon, awesome graphics and an interesting mix of game styles, there are high hopes for this one.

## NICK FALDO'S GOLF

SUPER NES

GAMETEK ● OUT AUGUST

After making an appearance on the Amiga early last year, Mr Faldo has decided to try his hand at putting a few birdies on the Super NES. The game isn't quite finished yet, but from what we saw it features stunningly detailed landscapes and looks to be one of the best golf games yet for the Super NES. With the golf season set to get back into full swing pretty soon *Nick Faldo's Golf* looks like the perfect alternative to watching it on television.

## MARUBENI HOCKEY

SUPER NES

MARUBENI ● OUT JUNE

Another ice hockey game is on the way for your Super NES, and this one has the makings of something special. Featuring Mode 7 views and incredibly fast gameplay we're expecting great things from this. There are options galore to choose from, including a four player game using the Super Multi-tap, and three game modes including the chance to win a Gold Medal in the Olympic challenge mode! With four difficulty settings there should be plenty here to keep even the toughest players happy.

## YOGI BEAR

GAME BOY

IMAGINEER ● OUT SEPT

This is the game based on the original Hanna Barbera cartoon series. A cowboy cloud ghost (see them all the time) has stolen Ranger Smith's money, which was to be used to keep Jellystone Park running through the winter. Instead of hibernating like most of the other inhabitants, Yogi (being smarter than the average bear) sets out to recover the stolen money and save the park. With six levels including a sunken galleon and a ghost town, it looks like *Yogi Bear* should be worth a sniffing out.

## VIRTUAL BART

SUPER NES

ACCLAIM ● OUT JULY

Featuring the most ridiculous cartoon family ever, this time Bart attempts to get his spiky little head around a new concept in Springfield known as Virtual Reality. The game is almost finished and will be released on a 24Mbit cart, so we can expect a barrel load of cartoon style animation and special FX. If you thought *Bart's Nightmare* was big, then wait for this!

## SPIDER-MAN & VENOM

SUPER NES

ACCLAIM ● OUT AUGUST

Spidey is the star of Marvel comics at the moment. His latest outing is a sideways scrolling beat-'em-up with large sprites similar to *Final Fight*, this is probably the type of game which Spidey is best suited to. The game is not quite finished yet, but with many of Spidey's arch rivals appearing as enemies and bosses throughout the game, it should appeal to fans of the comic, and beat-'em-ups. SUPER GAMER reviews it soon.

## RETURN OF THE JEDI

SUPER NES

JVC ● OUT WINTER '94

To conclude the *Star Wars* trilogy, JVC are releasing *Super Return of the Jedi*. The game is going to follow the story line from the film very closely, as with the previous two, and will include innovative gameplay and features. In fact there should be more 3-D flying sections than before, with the speeder chase through the trees on the planet Endor looking like it's going to induce a large adrenaline rush!

## MAGIC BOY

SUPER NES

JVC ● OUT SPRING '94

*Magic Boy* is a wizard's apprentice who has accidentally released all his master's monsters. Now he must re-capture them all! Very much in the *Rainbow Islands* mould, this cute platformer features 96 levels and some very interesting gameplay touches. The version SUPER GAMER played was almost complete and seemed very playable indeed. There are loads of secret rooms to find and it is bound to keep the most fanatical platform fan, beaming with joy!

# KONAMI

# GOLF

**FORE!** The ultimate professional golf challenge is here! With two courses, 36 holes, and a whole host of features Konami Golf will leave you feeling trapped, soaked and very roughed up. You'll need a keen eye and a steady hand if you're going to take on the pros at their own game. "...with great control, plenty of challenge this is an essential purchase that ranks up there with Tetris as a game that you'll come back to again and again." **CVG, March 1994.**

There are some games that go down in history as the best of their generation. *FIFA International Soccer* on the Mega Drive is one of those games, and it was voted game of the year by *SEGA PRO* magazine, but can the Super NES conversion hope to do better? Only *SUPER GAMER* can give you the answer when we review the game next issue.

Jovial PR person Nick Clarkson from Ocean (who are now releasing EA games on the Super NES) made the trip to *SUPER GAMER* towers in sunny Bournemouth this month and brought with him an almost finished *FIFA Soccer* cart. Stop drooling Damian!

If you've never seen *FIFA*, the game is viewed isometrically so that you are either playing up or down at an angle to the goal. The graphics, as you can see from these exciting screen shots, are absolutely stunning and finely detailed to capture every aspect of modern football.

The players in your control have stars at their feet and all have a number of fancy moves at your disposal such as back heels, headers, chips and of course the varied range of goal-aimed shots. One of the best features of *FIFA* is that you can hit the 'sprint' button for a sudden burst of speed, and this can mean the difference between outrunning the defender and scoring, or getting overwhelmed and losing the advantage.

Apart from the superb graphics and truly booming StadiumSound™ effects, *FIFA* also contains a huge amount of options such as offside, formations, tactics, game stats, action replays and it also contains every International team that will be playing in the World Cup.

*FIFA* is just one of nine(!) football games appearing in time for the World Cup this summer – who will win the cup as best game? Only *SUPER GAMER* can decide, next month.

▷ Get 30 clams and either character can visit the Carson fairground for the monster truck extravaganza.

No! I will not start this preview with Yabba dabba doo! Absolutely not, it's just so - well, tasteless. What's all this then, eh - a Flintstones game after so long, what are they playing at? I mean it's almost as if they were trying to cash in on the Hollywood film this summer or something.

Let's face it, Fred & Barney - you either love 'em, or you hate the way that in every episode a bird or a skunk turns to the camera and drawls out some amusing line about being used as a dishmop, or a stylus. What about the fact that no matter how bad things look, Fred always manages to save the day and get home in time to shut out the wild cat and then get locked out himself - ha, ha, how we laughed.

Unlike the fairly sad Mega Drive version, *The Flintstones* follows our prehistoric heroes around four massive landscapes, with each level set as a point on a giant games board. Fred and Barney must throw a dice to decide what square to land on, and then they must play through a horizontally scrolling platform level; collecting clams and treasure.

Collecting a total of 30 clams means you can visit the fun fair and play one of the hair-raising rides, or you can reach various shops, with handy items such as extra lives.

The real aim of each level, however, is to get to the stadium (usually found on the other side of the level) and challenge the the various colourful prehistoric characters to a mode 7 *Mario Kart*-esque race - be it on foot, or in your stone age motor.

As you can see, the graphics are highly colourful and crammed with a cornucopia of cartoon characters and capers. But you'll have to wait until next issue for the full review. Yabba Dabba don't-go-away!

# KICK OFF 3

△ Like most football games, Kick-Off 3 goes OTT with the celebrations.

▽ A player keels over in pain after one of Keith's dirty tackles!

△ You can alter more or less any aspect of the game in your favour. Get those fouls off for a start!

▽ Choose a set play from 1-7, then execute it by the touch of a button. It's your job to find the net!

△ A powerful overhead kick sends the ball surging towards the net like a comet!

▽ This guy loves himself... it wasn't even that good a goal!

If you're like me, and the very mention of the words "Kick-Off" trigger thoughts of uncontrollable players, tiny sprites and ultra-fast action, then don't fret because *Kick-Off 3* virtually rewrites the old format and the result is nothing short of spectacular!

*Kick-Off 3* is one of the many football games released to tie-in with the impending World Cup, and it has to be said that with such thick competition, Imagineer's sequel looks set to be amongst the cream of the crop.

Perhaps the most striking feature is the new pitch perspective. Gone is the birds-eye view with teams consisting of only heads and shoulders whizzing around at breakneck speed! The action is now viewed at a horizontal angle similar to *Virtual Soccer*, with more onus on the visual appearance of the players themselves – and with more frames of animation, these guys certainly look the part.

Despite the subtle face-lift, *Kick-Off 3* remains true to its origins with the same tricky control method, however, there is now a novice option which allows you to play the game with the ball sticking to your feet.

In my opinion the greatest improvement is in the gameplay. Unlike most other football sims, your team mates have got minds of their own and this comes into great effect when taking corners and free kicks. You choose a set play from 1-7 (each play varies depending on where on the pitch you are), and then at the touch of a button, your fellow players start tapping the ball around in a sequence. You control the person at the end of the sequence and so you eventually determine whereabouts the ball will end up!

I could go on and on about the many new and exiting features, but as this is a mere preview I'll wait until I get my mitts on a review copy next issue, but mark my words this is one hot title!

▽ The indoor six-a-side is about to kick off.

# WORLD CUP STRIKER

◁ Another top class goal as a result of a devastating diving header. Even Jimmy Hill will like that one!

◁ The ref needs glasses! Looks like poor old Gazza will be out for the rest of the season!

▽ The team select screen has been given a face-lift.

World Cup Striker is yet another contender for the ultimate World Cup tie-in football game and although the name alone will generate interest, it has a lot to live up to if it is to better its predecessor. After glancing through the endless lists of additional features, I was amazed at how many extra elements are included to make what was originally a classic game even better.

The extra memory space means that there's more room for international teams (the USA '94 qualifiers are all included, as well as eight extra teams including the "in yer dreams" England squad!), four different tournaments, and more additional pitch features than you could possibly imagine.

By this I mean more frames of animation on the players (they're also 33% larger than in the original), including emotions when goals are scored, a wider assortment of kicks including back heels, and, of course, that all-important foul button!

In my opinion the best feature is the multi-tap option. This allows up to five people to play simultaneously for hours of goal-frenzied action. Thankfully, Elite have included a battery back-up option to enable the player to take a breather whilst halfway through those gruelling tournaments, and keep those home-made teams stored safely away for a rainy day!

The new user-friendly menu system means that selecting the right options is no longer a tiresome chore. As well as new stadiums, pitch conditions, and formation controls, World Cup Striker also lets you select the partiality of the ref and the strength of the goalkeepers!

In short, the best just got better, and if you don't believe me, check out the full review next issue.

# TRAX OF MY TEARS

**We take a trip to another time with Malibu's exciting new game licence!**

Mention the words "Time Trax" to any British passer-by and they'd probably fix you a piercing frown and run away! However in the US it's an entirely different story, because *Time Trax* is a brand new Sci-Fi series featuring the adventures of a superhuman crime-buster, but more about that later. The fact is that THQ, under Malibu Games have spotted the impact that this series had on the American public and have snapped-up the rights to release *TT* on the Super NES. Ryan Butt probed Malibu for an insight into the game, the series and their rather impressive schedule for '94.

## STORMING THE BOUNDARIES OF TIME

Meet Darien Lambert (below), captain of the Fugitive Retrieval Section in 2193 AD.

Darien grew up a normal child of his times, with an IQ of 204 and a speed memorisation rate of 1-2 pages per second... slightly above average. Darien was also a competent athlete, his best time for the 100 meters

being 8.6 seconds... a time which would leave Linford in his tracks! As you can probably tell, human beings advance somewhat in the next two hundred years.

Extensive training in Beta Waves gave Darien the superhuman ability to slow down the speed in which visual images reach the brain, a term commonly known as "Time Stalling". This can be used to great effect when avoiding bullets, but alternatively it may be a gimmick for the TV series, so that Darien can get out of tight situations and traps, very much like Batman and his ever-resourceful utility belt.

After taking up a career at the International Police Academy and graduating top of the class, Darien was assigned to Fugitive Retrieval (a fancy name for a cop methinks!). About the same time, a chap called Dr Mordicai Sahmbi of MIT won the Nobel prize for physics for his theoretical work in Tele-Transportation of particle mass.

By the decade's end, Darien's confidence as an officer of the law had begun to decline due to his falling arrest record. For some unknown reason his suspects vanished without trace... but this was only the beginning!

## THE SERIES

*TT*, the TV series, was first aired in January '93 on the newly formed American Prime Time Network. Starring Dale Midkiff (nice name) as Darien Lambert, the programme chronicles the adventures of Lambert, who travels back in time to track down society's most notorious villains who, with the aid of Dr Sahmbi's revolutionary new time machine, have sought refuge in the year 1993.

This machine, known as

"Trax" (Trans/Time Research and Experimentation), was used by Sahmbi to send wanted criminals back in time in exchange for vast amounts of cash. This sure-fire money-making scheme was working fine until Darien cottoned-on to these illegal goings-on and hastily followed Sahmbi back through time to bring him to justice in present day America and send him, along with over 100 wanted fugitives, back to 2193.

Our rugged hero is aided in his mission by "Selma", a holographic computer designed to give advice and act as a diary to record his progress, similar to AI in *Quantum Leap*! In fact, let's not beat about the bush, *TT* is a complete *Quantum Leap* rip-off (as well as the cult movie *Trancers* - film freak Andy!); using the premise that everything is set in the present day so that they don't have to create any elaborate (and costly) sets and costumes.

The extended TV movie of *TT* is a pretty standard affair, with Dale posing nonchalantly in various designer jackets and T-shirts, sticking out his football scholarship square jaw a lot and moving from one badly lit warehouse to another. The special effects aren't bad, but like all promising ideas (*V*, *War of the Worlds*), the auspicious beginnings will no doubt end in the money running out and future episodes being mocked up from out-takes from old B-movies. Maybe we're being too judgmental? Time will tell. The big questions is why are Malibu releasing a game based on *TT*? Oh, that's what this article is leading up to! Yes, the Super NES version is just being tweaked for release soon, and despite the fact that *TT* will probably never be seen over

here - the story makes for a damn good game. Want to know more?

## THE GAME

*TT* on the Super NES is basically a platform caper based on the characters' exploits. The game spans through many impressive and varied scenarios ranging from computer labs in 2193, to present day museums, city streets and even Hawaiian islands. The central character, Darien, comes equipped with his hand-to-hand combat skills, an advanced form of karate known as Mash-Ti, and his futuristic phaser gun, which can be used to stun opponents, *Star Trek* fashion. Darien's "Time Stalling" abilities also play a prominent part in the game. In fact, practically everything in the series has been included by Malibu's team of professional programmers.

Fans of the platform genre will certainly be excited by what *TT* has to offer. The graphics, especially on the helicopter chase sequence are nothing short of stunning, and the tunes and sound effects to accompany the action are by far some of the best heard on the Super NES for a long time. Think of *Super Probotector* and you will know what to expect.

*TT* also features eight explosive levels crammed into the 8Mbit cart, and will certainly appeal to shoot-'em-up fanatics.

◁ Ooh, isn't Dale hunky? Not a bit like David Hasselhoff at all.

# SUPER GAMER TALKS TO LARRY SEIGEL

*TT* is being released by Malibu Games, one of THQ's many distribution labels. Although THQ got off to a rocky start on the Super NES, *Taz-Mania*, *Total Carnage* and *Ren & Stimpy* proved that they're certainly capable of releasing top quality products. We here at SUPER GAMER are always anxious to put across the publisher's point of view, and so our man Ryan probed the Vice President of Product Development at THQ America, Larry Seigel at his California office. Some guys have all the luck...

**RB: Why did you choose to pick-up the *TT* licence?**

LS: Well, *TT* has been a successful TV show here in the states for the past year now and has attracted a relatively young following.

**RB: Will it be a one off?**

LS: I think that before we make a sequel to *TT* we'd have to see how the sales go on the first one. I have to say that they were both relatively good products as far as side-scrolling adventure games go. The English company, Malibu Games that produced it, did a beautiful job in both the graphics and play mechanics. There are a lot of hidden features and a lot of big sprites moving around, and I was very happy with the product.

**RB: How did you decide which game format best suited the theme of the programme?**

LS: Well you have to remember that this is somewhat of a detective game. We wanted to put in all the interesting features of the programme, such as Time Stalling, where you push a button and time virtually slows down and you're

able to accomplish a lot of things. I have to tell you that horizontal scrolling seems to be the way of 80% or 90% of the games today, and this was really more of a detective story than just a shoot-'em-up. I mean yeah, there is this guy who has a gun and he's shooting at bad guys, but he is also trying to find coins and power-ups throughout the whole game. Personally for me, I think that makes the game fascinating, that you can find these secret rooms and it takes an imaginative, creative player to find them. Side scrolling is the kind of format that allows you to do that.

**RB: How long did *TT* take to develop?**

LS: About a year. We commenced development last spring and both products were finished about 30 days ago, both the Nintendo and Sega versions were done simultaneously.

**RB: Were there any problems?**

LS: No, the people that owned the *TT* series were very involved in it and they were very supportive. The product is later than we would have hoped - we would have liked to have done it last Christmas, but we wound up putting more in than we originally planned. I think we made a better game in the end!

**RB: To someone who knows nothing about what *TT* is all about, how would you sum it up?**

LS: Well, Darien Lambert is basically a detective and it is his job to travel back through time and apprehend bad guys who have moved through the space/time continuum. Darien goes through a whole bunch of gyrations trying to capture them.

This is not the massive action beat-'em-up concept of *Mortal Kombat* or *Street Fighter*, it is much more of a detective story and it is a competitive, challenging game. Although it is certainly worthy of making any player's palms perspire, it is also a thinking man's game! *TT* also has very stunning and really attractive graphics, as well as some highly imaginative features. People that buy it will be impressed by the play mechanics and the graphics. There's certainly more to it than wham, bam, thank you mam!

**RB: Thank you.**

Apart from *TT*, THQ have rather an impressive schedule for '94, with *Akira* (based on the popular Manga video), *SeaQuest DSV* (based on the recently screened series), *The Mask* (based on a popular Dark Horse comic and forthcoming film), and a sequel to *Ren & Stimpy*. SUPER GAMER will have the full exclusive story behind all these titles very soon, as well as interviews with the programmers and stars, and in-depth behind-the-scenes material, unseen by any other computer journalists. Stay with SUPER GAMER for all the latest game information.

*Time Trax* will be released in May at a retail price of £44.99 and will be reviewed next issue.

# THE FRENCH CONNECTION

## SUPER GAMER GETS THE INSIDE STORY ON LORICEL!

Only if you are incredibly clued up on computer knowledge will you have heard of Loricel, because for the most part, Nintendo owners have not seen any of their highly original games in the UK. Yet, this highly successful French company was formed over ten years ago and have been actively producing games for home computers since September 1983!

The key thing to remember about Loricel is that it is a very friendly, customer orientated company. The programmers always have time to talk to you, PR people are never too busy to talk for ages about what they are doing, and anyone can visit their offices in Gennevilliers. For their games, the emphasis is definitely on originality and quality, but they have not yet hit the big time with a truly huge title like in the UK.

In 1989, with a brace of games doing well all over the world, Loricel created a second label, Futura, to differentiate between the games aimed at younger gamers, and those pitched at a more mature audience. Many of the games up until then had been cutesy puzzle and adventure games, but *Panza Kick Boxing* and *The D-Day* brought Loricel big time success with older players.

SUPER GAMER has had unparalleled access to Loricel's games laboratories because, amazingly, they are mostly ignored by the British press, who are more concerned with satisfying larger companies. Never forget however, that software giants Ocean and Acclaim, and yes, even Nintendo began small. In the latter's case; making playing cards before getting into the video games business.

There are currently 28 employees working at the offices, and a further 25 external games authors who all combine to produce the 7-10 games that Loricel release every year. Previous titles include *Best of the Best* (all Nintendo formats), *Davis Cup* (NEC PC-Engine), *Super Skweek* (Atari Lynx), and now *International Tennis Tour*, *Jim Power 3-D* and *Val D'Isere Championship* on the Super NES.

With Mindscape just signed to release *Val D'Isere* on the Super NES into the UK, SUPER GAMER talked exclusively to Chairman Laurant Weill about Loricel and Mindscape – the French Connection.

## SUPER GAMER TALKS TO LAURANT WEILL

**SG:** How do Loricel decide what games will be released? Do the programmers come up with the ideas, or does someone sit down and say "we need a ski game, a 3-D game and an adventure?" Who makes the decision?

**LW:** As Chairman, I am responsible for the games that are produced, with our development manager. But the development of a game has to remain a team work. The initial idea may come from the programmers, anybody in the team, or even from somebody completely independent – but the decision is always made by the team. The genesis of a game is a long journey and we know that a game can't be successful if the persons working on it don't believe in what they're doing.

**SG:** On average, how long does it take to program each game. How many people are involved in each project?

**LW:** The average development time is one year, and about ten people are working on each game at any one time.

**SG:** Out of all the games so far produced by Loricel, what are your favourites and why?

**LW:** It's a difficult question because when you work on a game for such a long time you get attached to it. Each game has its own story, but I could say that my favourite is *Val*

△ Snowboarding down the slopes, our intrepid sportsman collides head-on with several oblivious yuppies in Loricel's *Val D'Isere*.

*D'Isere Championship*. First of all because all the team did a splendid job: we developed a new special routine that gives a fantastic speed effect, and the game is a great skiing simulation (and a big success!). On the other hand, we worked with great partners (*Val D'Isere* and *FILA*) who helped us a lot; giving technical skiing advice. The game was also tested by members of professional ski teams, so that helped.

**SG:** What non Loricel games do the rest of the team enjoy playing in their spare time?

**LW:** At lunch time, our test room is regularly overcrowded. On the agenda is often *Super Mario Kart*, *Super Bomberman* and *Total Eclipse* on the 3DO.

**SG: What development machines do you use to program the games, do you have separate people for sound, graphics etc?**

LW: To program the games we use PCs, SNASM and many different tools developed in-house. For the graphics we use 3-D Studio, sound is created for the Super NES with a keyboard and an Atari ST with Notator. Also we have the Akai 1100 sampler for the sound effects.

**SG: How hard was it to get your games sold in America, are you finding it difficult getting games distributed in Britain?**

LW: It was not very difficult to find partners in America as well as all over the world (even in Japan!), but I must say that it has always been difficult in Britain. However, the French have a good reputation for creation and this is why we have just signed with Mindscape a few weeks ago for *Val D'Iserre*.

**SG: Do French kids prefer different types of games to other nationalities?**

LW: No, we don't think French kids are any different from others. Their tastes are all the same and video games culture becomes universal.

**SG: What is your biggest seller of all time?**

LW: Our biggest seller of all-time is *Best of the Best Championship Karate*, which was also called *Panza Kick Boxing*. This game received a lot of awards all over the world, especially for the Super NES version last year, and more recently in Las Vegas for the Mega Drive game.

**SG: Does Loricel intend to produce games for any of the new machines such as the Atari Jaguar, 3DO, CD32 or Project Reality? What do you think of them, which do you think will succeed?**

LW: Loricel is a Jaguar and 3DO licensee and of course we are interested by the most innovative machines and are waiting eagerly for Project Reality and the Saturn. However, it is a bit too early to reveal

△ *Val D'Iserre* features some of the best Mode 7 graphics on the Super NES. Once you get going, the screen moves at an incredibly fast rate!

our projects or to say which new machines will really succeed. We'll announce something later in the year.

**SG: Tell our readers what you think makes a good game?**

LW: A good game is a mix of different good points. Originality and fresh ideas in the technical side are very important, just like films.

**SG: Why are Loricel games so varied, and why do you think you've never had a truly massive game like *Mortal Kombat* or *StreetFighter II*?**

LW: As you know, finance and marketing often make the difference between games on the market. Unfortunately, today the success of a game doesn't depend only on

the quality of the game itself. There are plenty of examples of games that are technically excellent, but don't sell well because they are not supported by a massive marketing campaign. Don't forget that *Mortal Kombat* and *StreetFighter II* were both already known as arcade games.

**SG: Finally, what will Loricel be doing in five years time? How do you view the future of console games?**

LW: Loricel prepares for its future with big productions for CD games (PC and 3DO), interactive movies made of video images, and even interactive TV shows... But we still believe in original and high quality games based on good ideas.

**SG: Merci.**

## JIM POWER 3-D

The first and probably only game to use actual 3-D glasses to enhance the gameplay and make those enemies literally leap out of the screen, this 8Mbit cart is the result of two years development. *Jim Power* features complex three stage scrolling backgrounds, superb mode 7 shoot-'em-up levels, 50 images per second (sounds a bit of a tall story to me - Ed) and 12 different music tracks. We will review this European classic as soon as the release date is announced.

Although Mindscape has just taken *Val D'Iserre* Championship for the UK, *Jim Power 3-D* and Loricel's latest (and so far secret) big license are still awaiting a release slot. In an effort to glimpse

the future, SUPER GAMER takes an in-depth preview of Loricel's greatest games yet. Full reviews as soon as we hear of a release date. ☺

## VAL D'ISERE CHAMPIONSHIP

The one thing that the Super NES doesn't have yet is a ski sim that actually takes you to the slopes to bring you the full leg-twisting, sheer-dropping 90MPH scream-fest. With the Winter Olympics game turning out to be such a fiasco, where else can you turn to if you want a decent ski or snowboard game?

*Val D'Iserre* is a mode 7 first person perspective Olympic event from start to finish. You must guide your athlete down various black runs and slalom courses; avoiding rocks, trees, icy patches, and streams, before hitting each checkpoint in the time allotted. *Outrun* on skis?

The graphics, as you can see from the screen shots, are extremely detailed and you get an impressive view of the opposing mountain as you make your descent. An excellent and original feature is the way that as you plunge over the crown of the slope, the sun momentarily blinds you; causing snow blindness and bands of yellow and purple across the screen. Although annoying, this is highly realistic and adds considerable tension as you weave and swerve through the three complicated competitions: Special, Giant and Downhill.

The object of the game is to get to the end of the set courses in the fastest times and there are plenty of chances to record times and attempt to better them for gold medals. *Val D'Iserre* will be released by Mindscape, probably in June, so look for an exclusive review in SUPER GAMER, soon.

△ Oh no! Just as you reach the finish line of the toughest slope, you run out of time. What a bummer!

# multiple ARGASMS

## SUPER GAMER TALKS TO JEZ SAN

You can try, but it is damn hard ignoring the influence that Argonaut Software has had on the video games market. First there was the ground-breaking *Starglider*, which featured ultra fast wireframe graphics, for the Spectrum, Commodore, Atari – in fact, every system known to man! Argonaut, and its founder Jez San has strived to produce original and stunning games, when the trend has been to write identi-kit platform film licences and cuddly shoot-'em-ups. *Starwing* is a legend in its own time because the superb shaded graphics and speed made it an instant million selling hit, and also because it contained the revolutionary Super FX chip. Just what is the truth behind this mysterious chip? Is it as powerful as they say, and is *Starwing* going to be small fry compared to *Starwing 2*? We asked all these questions and many more to Argonaut's Managing Director, founding member and main drive behind the company: Jez San.

△ Vortex – featuring some stunning Super FX graphics.  
◁ The man responsible for a new generation of games.

# STARFOX 2 VORTEX STUNT RACE FX

**SG:** Tell us how you first got started and when you formed Argonaut?

**JS:** Argonaut began in September 1982, it was a one man company. I was working out of my bedroom for several years and then with *Starglider I* made a decent amount of money and it was enough to get an office and hire other people. We managed to do *Starglider 2* with a team of about six people and we grew from there, that was in 1989.

**SG:** The name Amblin entertainment comes from Spielberg's first film, but how did you decide on Argonaut?

**JS:** That was a joke when I was 14. I wanted my business partners to say "J San of The Argonaut" (Jason and the Argonauts – Ed). That was while I was still a one man company.

**SG:** How many programmers, designers and graphic artists do you currently employ, and how many projects are they working on?

**JS:** We have about 20 programmers and 20 artists. Most of the artists

are animators, especially 3-D animators. We have about five designers – they write down ideas and get the story structured with flowcharts so the gameplay is a known quantity in advance. We're doing about ten different projects at any one time, but some of them are on five formats while others are only on one, so it's hard to say really.

**SG:** I noticed you're developing some new chips, do you concentrate on the hardware side of the industry as much as the software?

**JS:** Yes definitely. We like to think we're good at innovating. Not only do we push the boundaries of software, we try and do the same thing for hardware as well. We want our hardware division to grow, that will be a very big part of our future.

**SG:** *Starglider* is of course the game that made your name, but why haven't we seen it converted to the Super Nintendo yet? Surely with the FX chip, this would have been the logical game to convert?

**JS:** We actually started writing a version for the NES called *NESglider*, and showed it to Nintendo – they liked the technology, but they didn't like the game and it was at that point that we started working with them on *Starfox*. I say *Starfox* rather than *Starwing* because we always called it *Starglider* in-house, and it was only renamed *Starfox* towards the end of the project.

**SG:** So when did your relationship with Nintendo start?

**JS:** We began working with Nintendo before the Super NES even came out. Argonaut worked jointly with them, and they contributed all the ideas while we did all the programming and designed the Super FX chip for them. We worked with Shigeru Miyamoto (*Super Mario World* and *Starfox*) who is a brilliant producer and his team; who are very creative. They showed us the type of gameplay that they know people enjoy and we learned a lot from that.

**SG:** *Starwing* was an incredible success, why has it taken so long to develop the sequel?

**JS:** The reason why is because most of our efforts have been going into *Stunt Race FX* to make sure that's finished on time.

**SG:** When will *Starwing 2* be finished and how is it different from the original?

**JS:** *Starwing 2* should be completed by the end of the year – it's going to be very special indeed.

**SG:** Why are the Super FX games only just starting to appear now when the success of *Starwing* would have been the perfect time to capitalise?

**JS:** You don't want people to get tired of a format too quickly. It's like if *StreetFighter Turbo* was released straight after *StreetFighter II* then nobody would have bought it. Also, there was no development system around at the time, so the Super FX chip wasn't widely available. Now that it is, tons of companies are producing games. Currently, there are several companies in America

and a few in Japan who are producing FX games.

**SG:** We've heard that a prototype game was created before Starwing, what happened to it?

**JS:** Yes, we did a kind of *Battlezone* game, but it never came out. We did it as a prototype, it was a bit too simple; just move around and shoot things, just like *Battlezone*, in fact. It might have been okay for some companies, but we like our games to have a bit more character and depth.

**SG:** Does it take longer to program an FX game than a normal one?

**JS:** Yes, you need to be more technical to be able to do it. The programming level of expertise to do a Super FX chip game is much higher than the level of expertise required to do a normal Super NES game, so that cuts down on the number of developers capable of doing it. We're not saying that we're the only ones that could do it, but there's a lot of companies that couldn't – it would just be a bit too technical for them, or there would be a huge learning curve.

▷ The desk where Super NES symphonies are made. Note the *Take That* poster!  
 ▽ One of the CD ROM teams.

**SG:** What is exactly inside the Super FX chip?

**JS:** It's just a RISC microprocessor, like the ARM chip used in the 3DO,

the new Sega Saturn (cringe) and Project Reality. They all have RISC chips in them, they're a bit more sophisticated and a bit harder to program efficiently compared to a regular processor.

**SG:** Describe the thinking behind *Stunt Race FX*, whose idea?

**JS:** We started *Stunt Race FX*

before *Starfox*, but we put it on hold while *Starfox* was being completed to get it finished. *Stunt Race FX* has been going on a long time and there have been a number of massive changes to it to make sure that it's as fast as possible. It's now on 256, not 16, colour mode, which means that there's twice as much data to shift around; a big technical problem, but the FX still manages it.

**SG:** How do you feel about *Stunt Race FX* being shown at various shows before it was ready, and receiving a fair amount of criticism?

**JS:** It's obvious that when it was shown two CES's ago called *FX Trax*, it was definitely nowhere near finished and it was a shame it was shown that early, because basically the criticism that we got was "Hey, it's not finished!" and well, we knew that. So when it was shown in January called *Stunt Race FX* it was much more representative of the finished product. In the last three months we've had time to optimise the game and improve the speed and make sure it's even more fun. No-one was ever telling us

things we didn't already know – it's a case of it takes time to make a good product, and ultimately the Super NES's still got an 8-bit bus. It might be a very good machine, but it's still got a lot of bottlenecks. The Super FX chip can fix some things, but it can't fix everything!

**SG:** There are rumours that Argonaut will be developing an alternative to *Project Reality*, is this true?

**JS:** We do develop 3-D hardware and we have chips in the works that are incredibly powerful, the performance of which probably does beat *Project Reality* and many other systems around. But it's not true to say that we're developing an

alternative to it, because our 3-D chips might get sold into a different market. They might not be in the console market, in fact I'm almost certain that they are going to be in the PC market.

**SG:** What do you think of the current state of software on the Super NES – do you think that 16-

bit is already outdated? Where would Argonaut like to go next in terms of technology?

**JS:** Apart from the Super FX chip games and *Scooby Doo*, we're not doing any other games for the Super NES. We'll probably call it a day in a year's time because it's becoming very difficult to compete in the Nintendo market. It's very crowded, there are a lot of games, many of them are the same kind of game: fighting games, car racing games and mainly platform games. Change the graphics and the license and you've got a different game. When the market stagnates like that, we like to move on. We're known for innovation and it's hard to do that when the market wants platform games that are all the same as everyone else's. We're already doing a lot of CD games here and when the CD machines are shipping we'll be doing the next thing. Argonaut always likes to stay a year or two ahead of the market.

**SG:** What was the situation with the Super FX chip 2. Did you develop it, or did Nintendo?

**JS:** The Super FX chip 2 is the one that we designed. The Super FX chip that came out with *Starfox* was a temporary one, it was like a test version just to prove that it worked without it being finished. But because the manufacturing process of chips takes so long, we decided to release *Starfox* with that early version, and although *Starfox* looks incredibly impressive, it's only running at half the speed of what the original design was supposed to do! The Super FX chip 2 is the one that we originally designed. There's also a Super FX chip 3 that we've designed, that will never come out, and that's even faster still! But it was Nintendo that decided to call the latest chip FX2. As far as we're concerned it's FX1. **SG:** Will the FX 3 never come out? **JS:** It won't be necessary because *Project Reality* will be out before the need for the FX3.

△ Exploring underground as well as on the surface is an integral part of playing Vortex.

**SG:** Argonaut were developing games for the Super Nintendo CD drive, what happened to the games, can we see them, and will anything ever happen with them?

**JS:** No, because there's never going to be a Super Nintendo CD, we've had to write off all development of them. We took a risk, but it didn't pay off.

**SG:** What do you think about Project Reality being cart based rather than CD? Is this wise?

**JS:** It has some advantages like instant access to any part of the game. It also means that the actual console can be much cheaper and you could always add a CD ROM drive as an upgrade later. But, certainly the types of games we're developing here could never be done on a 100Mbit cartridge.

**SG:** In your opinion, out of all the machines currently surfacing which will be the outright winner?

**JS:** That's tough. 3DO is the only one of the 32-bit systems that is shipping, and the Jaguar's just starting to ship, but doesn't have a CD drive at the moment, so they won't compete head-on until they have one (which won't be until later this year). 3DO obviously has the bigger momentum. It has more developers signed up – about four or five hundred! The Jaguar only has 60 or 80! The 3DO has more money to spend on marketing, they have a three hundred million dollar company, Atari is much smaller, so just because the Jaguar might be better, it doesn't guarantee success, and it's still not shipping in great quantities. Can you just go out and buy one? So, 3DO's the most likely in the short term. The Jaguar hopefully will catch on, but who knows? In the long term Sega will certainly do very well with the Saturn and they've announced it will be out soon, so they'll beat Sony and Nintendo too. Project Reality is too far away – they're talking end of 1995 which is very far away and we don't have any details on it yet.

**SG:** Offering games through cable is growing in the US and there's talk of using satellites to send games all over the world straight to your machine. How do you feel

about this, will it be what Argonaut gets into in the future?

**JS:** Argonaut are directly involved with that, as I explained, we're always keen to move into new technology and explore the next generation market. The Set Top Box market, which is what that is, is the next big thing. When you have direct broadcast games, you can bring them out for much cheaper and you don't have to ship them or manufacture them. You could be paying a dollar an hour to play the game, and that way if an average game is 30 to 40 hours use, you've paid a lot less than if you'd bought it. If however it turned out to be junk, then you don't have to play it for long and you've saved a fortune. You pay per play, that I see as excellent – it's going to really revolutionise the games business and make it more cost effective. Developers will spend more time and more money on a game; creating the content, filming live actors, making real studios – they'll put a lot more effort into the games because they'll know good games make money and bad ones won't. I think it's good for the industry.

**SG:** Finally, what games are you currently thinking of doing? We know you are an avid programmer, but does this mean your head is buzzing with ideas?

**JS:** We have at least two more Super FX chip games in the works which will be out towards the latter part of this year or early next, and they're really special – we'll leave the market with a bang, but I can't tell you anything about them for at least six months. If they're going to be our last FX chip games we want them to be really special. Watch out! ☺

△ Argonaut have their own VF arcade machine in the games room!

## KEITH PLAYS STUNT RACE FX!

After a brief play of *Stunt Race FX* I have to say I was very impressed. The graphics are very colourful and feature some detailed texture mapping on the cars and the background. There are several cars to choose from and each have different handling attributes and are best suited to specific tracks. If you want to know how fast the game moves – the answer is "very!" The complex tracks race by a furious pace, easily as fast as *Mario Kart* on 150CC!

Some of the obstacles encountered as you race around include wooden bridges swaying in the wind, precarious mountainside hairpins and winding tunnels. All the computer racers are intelligent and are not adverse to homing in on you and attempting to ram you over the edge of a cliff. This all happens at an incredible pace, with apparently no slow-down at all. How this has been achieved along with everything else the game boasts is a small miracle. *Stunt Race FX* really is going to be worth the wait.

# WORK IN PROGRESS

They're short, they're cute, they've more hair than sense, they're starkers (well, not on the Nintendo version!), and they're about to kick-ass on the Super NES... What are we rambling on about? Read on...

Tying-in with the recent revival of those fluffy haired trolls we all used to chew during our exams, Gametek have leapt straight on the bandwagon and used the little critters to great effect in their new release.

The four wide-eyed heroes each gained a special power from Albert, the oldest and wisest Troll of all, in preparation for the long battle ahead. Pink Troll can do high jumps, Red Troll is very fast, Green Troll is very strong, and Blue Troll can swim underwater.

The aim of the game is to restore colour to the islands. This is done by running

Troll-lover is Gametek's very own Adrian Cale. Ryan Butt quizzed him for a further insight into the wonderful world of Trolls!

**RB: Who is Super Troll Islands primarily aimed at?**

AC: Initially, Trolls was aimed at young kids, however the game has opened-up a lot more since then. As we began to receive more and more feedback from older players who liked the game it became clear that it appealed to everyone. I think it's a very good platform game, even if you take the Trolls scenario away it's still a very good platform game regardless. I think the name Trolls can have quite a definite effect on the younger gamers.

**RB: Despite being a platform game, Trolls has rather a novel theme, would you care to elaborate?**

AC: Yes, I mean Trolls isn't just a platform game - there's basically a Painter theme. You've got areas of scenery which are all grey to start with and you fill in the colour. There are many ways in which you can complete the game, what you have is a series of windows with ladders; if you

just want to finish it quickly you just fill in the squares, and then when they're filled in, you return the colour and a landscape appears in the windows and throws out the bonuses. Or you can run around and colour in the rest of the landscape without colouring in the windows and then colour in the windows to complete it. So you're actually getting more than a platform run and jump style of game - there's actually thinking involved you know. There are also a lot of puzzle elements, with objects being moved around to get to other areas.

## We sneak a quiet look at Gametek's amusing new platformer...with a difference!

The game, cunningly titled *Super Troll Islands* features four different Trolls (easily distinguishable by their hair colour), who have taken it upon themselves to restore life and colour to their light-starved land after the Evil Overlord maliciously took it away!

around the various platforms, every step your Troll makes will colour the ground on which he walks. Other sectors of the island can be recoloured by outlining them, similar to *Cacoma Knights* and the old *Painter* games. Once every part of the level has been coloured, your Troll will be subjected to a barrage of bonuses which must be collected within a time limit.

*Super Troll Islands* is basically a platform freak's fantasy! It features bright, colourful scenarios, frantic action, heaps of power-ups and tons of bonuses. The way in which certain Trolls are needed to complete certain parts of the levels is a novel touch and adds an element of strategy.

The visual appearance of *Super Troll Islands* is very appealing, especially to the younger generation and the gameplay is so addictive I dare say the old players will love it as well... although I doubt that they'll admit it! One guy who openly admits to being a

△ Green Troll takes time out to enjoy some sand, sea and... er, sand castles!

▽ Orange Troll smiles with delight after finding some dosh!

**RB: Who developed the game?**

AC: It was developed by a company called American Software Corporation. They're based in Stanford, Connecticut.

**RB: How long did it take to produce?**

AC: It took approximately 14 months. As I said, it started off as a general kiddies type game, but has opened up a great deal. I mean, some of the levels are quite huge! A lot has been added to it to make it a much larger game. You guys have got some chips there... isn't it a great game?

**RB: It sure is Adrian, although I don't want to give too much away to our readers, it certainly looks very promising. Having played it, I liked it!**

AC: Yeah, I mean I don't know anyone who doesn't - that's the point I'm trying to get across. You're obviously an older market to what it was initially going to be geared towards and it has evolved into a very good game for everybody, not just for the kids.

**RB: What do you think makes the Trolls so appealing, just how big are they, and how important are they for selling the game?**

AC: They're about six inches! Sorry, I've been trying to use that one for ages as well as the fact that the game is very controllable (ho, ho - Ed)!

**RB: Erm... yes, looks as though Adrian's gone off on an entirely different tangent here!**

AC: Sorry you were saying... oh yes, well obviously it's an automatic market. If you look at the parents buying something, they're going to look around the shops, you know, little Billy's birthday, what shall they get him? They know he's got little Troll key rings and whatever else he has and then they see *Super Troll Islands* with the relevant

review scores on the back. Straight away they'll pick it up and think "well we know about these Trolls" - it's instantly recognisable. So in that sense the Trolls are very important. On the other hand, if we were

△ Quick, find some bushes. It looks as though Green Troll is in desperate need of spending a penny!

to put in a different platform star, I feel the game would also be very big, but in a different way.

**RB: Finally Adrian, what else does Gametek have in the pipeline?**

will be released in April and will be reviewed next issue.

▽ Green Troll tries in vain to get his tongue around the giant lollipops, although I wouldn't like to meet the thing that took a gargantuan bite out of the one on the end!

△ What a pretty scenario. This picture of tranquillity is what you're presented with once the level has been completed.

AC: Well we've got *Spectre* which as you know is a classic Apple Macintosh game. In fact *Spectre* and *Super Troll Islands* are our strongest Super NES titles. You know *Spectre* is great fun for the younger market and indeed a classic amongst the older players. It has a very broad appeal, as has *Pinball Dreams* and *Trolls*, as I said is a very, very nice game.

**RB: Thank you. Super Troll Islands**

# CHOPPLIFTER III

**DAMIAN**

This madness began with *Defender* in the late Seventies. The object was to blast everything in sight and rescue small indistinct blobs from advancing aliens – classic stuff. Nowadays, the aliens have been replaced by terrorists, and the graphics have improved, just a little. *Choplifter III* is the latest in a long and distinguished line of shoot-'em-ups featuring a small helicopter against innumerable odds. Previous incarnations have seen *Choplifter II* on the Game Boy and of course the coin-op, but this is the first time the Super NES has experienced the phenomenon. Beware, you must like mindless violence to read on.

*I love the smell of napalm in the morning!*

▽ This satellite view appears at the beginning of each mission. Shame it couldn't have been used to greater effect, really.

As in most blasting games you play the clean shaven top pilot of a Huey Cobra attack helicopter and your mission is to rescue a set number of hostages and POWs from four separate war zones and ferry them back to base. Your chopper is equipped with normal guns, but you can also collect extra firepower such as homing missiles, napalm, bombs, flares and even limited invincibility (handy for defeating guardians).

The graphics are on a par with a coin-op and are well detailed, with particularly excellent war vehicles like the Scorpion tanks and APCs. The backgrounds are all parallax scrolling and this is particularly effective in the city level where you race between tall pipes and a burnt out building.

Like *Defender*, you must swoop in low and pick up the waiting hostages, whilst avoiding missiles from the enemy. In the first level, this means fragging huts in a Vietnam-style jungle and watching out for snipers, but other levels pit you against a battleship fleet, a war torn city, and even some underground missions.

◁ The guardian at the end of level one is a massive battletank. Stay at the top and shoot down to defeat it.

These rebel bandits will swivel around to keep hitting you as you pass.

The power-ups throughout the game are parachuted in, shoot them to get the bonus item or you lose it.

You may think we've been incredibly lazy by only mapping the first level for this review, but hey – we'll be covering *Choplifter III* in the tips section soon, so you'll have to wait. The first level is set in the jungle – just like Vietnam, man! The main dangers are fanatical bandits taking pot shots at you, a couple of tanks, and some nasty big guns at the end. The huts all hide hostages so blast everything in sight and make sure the civilians don't get fragged by mistake!

# WEAPONS

You didn't expect to fight the enemy with fluffy pillows, did you? This is a list of the powerful arsenal at your disposal; use them wisely and try not to hit any small children or old people.

## BOMBS

Basic death weapon – these can be used to take out small huts.

## CHAFF

If you have missiles on your tail, drop one of these and it will miss you.

## HOMING MISSILE

Fire off one of these and they home in on the nearest big target.

## LADDER

You will need this on the second level to pick up POWs from dinghies.

## MISSILE

More powerful than bombs, but they only fire in a straight line.

## NAPALM

Small and disappointing burst of flame, useful for taking out soldiers.

## SMART BOMB

Destroys everything on the screen with one big bang!

## SPREADING SHOT

Sends out three balls of fire in a large dome shape. Very useful.

△ This is the huge level one guardian. Blow up all the buildings, then shoot the big gun to win.

◁ Every time you fill up with POWs, ferry them back to your friendly base and drop them off for more points.

There are four main levels in this battle fest, but each has four sub levels including two huge mechanical guardians at the end. The hostages all wave their arms as you approach, but animation is limited and I would have preferred to have seen some huge explosions instead of the rather tame puffs of flame. I think Ocean could well have taken a leaf out of Capcom's book with their *UN Squadron*. Here is a game that has brilliant graphics and sound, plus the added attraction of kick-in-the-goolies explosive action. *Choplifter III* lacks some of that punch, but it is still highly enjoyable and just as involving.

The proceedings are watched over by your commander from an orbiting satellite, but far more

Beware of suspicious open spaces. Why would the enemy leave some POWs to be rescued?

could have been made of this interesting angle. In *Metal Marines* for example, you are given advice before the mission, and this would have been a good idea in *Choplifter III*. Also, I think this game could do with being a lot more difficult and longer. The coin-op was fiendishly tough, but this made you want to waste all your dinner money trying to get to the end.

I have to say that *Choplifter III* is well presented, like all games should be. The title screen features a great picture of a menacing helicopter, with spinning rotor blades, and there is a comprehensive list of options including useful passwords for each level and two difficulty settings. The difference between the two is that one allows you to kill the hostages if you fire at them. Not a huge difference you might agree, but believe me – it is incredibly annoying to accidentally blast your one remaining captive right at the end of the level!

Apart from the well drawn graphics (although nothing can match the superb Bob Wakelin box artwork!), this game also has some meaty gun sound effects and music, but I think more explosion noises and a decent rotor whomp could have made it even more effective. *Desert Strike* showed just what real gritty combat sounds like.

I quickly found that the real challenge in this game is not necessarily rescuing the POWs from the enemy's clutches, but trying not to kill them all as you mercilessly rake the terrain in an insane blood lust! The enemy make it very difficult for you by positioning themselves right in the middle of the hostages; literally daring you to shoot them. This adds spice to the gameplay and it is one of the reasons why *Choplifter III* is so compelling.

You can be fighting a strong headwind as you hover over a rolling battleship, the air black with AA fire, jet fighters hurtling in, and some starved allies shouting for help. The only thing to do is grit your teeth, pitch the nose into the fray and use that ever-so-

## RYAN

Despite the sheer addictiveness of the original *Choplifter*, I was a bit dubious as to how a sequel would fare against the hefty Super NES competition. However, to my utter amazement I found it to be more playable than ever! Although the format has been flogged to the high hills and is arguably overshadowed by the mighty *Desert Strike*, *Choplifter III* wins through with excellently detailed graphics, funky tunes, a great challenge and playability you could just melt into! If carnage is your thing, then waste no time in snapping up a copy of *Choplifter III* without delay!

▷ Use the ally repair stations to replenish your flagging shields and get back into the action.

▽ "Battle stations!" (in sad Sean Connery Russian accent.) Level two is set in the ocean.

handy rope ladder to drag the hostages clear. If this is your idea of fun, then look no further because *Choplifter III* has it in spades.

The only game like *Choplifter* that I can remember was on the CBM64, called *Battle Valley*. This was a similar idea, but you could control either a tank or a helicopter; using the chopper to bridge gaps so that the tank could reach the forward base. The graphics were worryingly similar, but *Choplifter III* would have benefitted from more vehicles to control like jeeps and tanks. Many gamers might get bored with using the same transport for every mission and who can blame them?

So how would I sum up this offering from software giant Ocean? Well it's yer basic enough shoot-'em and rescue-'em-up game, it sets the pulse racing, demands swift reactions and more than enough adrenalin to complete, and I think it's damn good. My only quibble is that with only 16 levels, you might complete it fairly quickly, but it is also the sort of game that you want to play again and again, so that may not be a problem. An important thing to remember with this top game is that it also costs only £39.99. That makes it the cheapest new Super NES game on the

△ You must collect the ladder on the second level to be able to rescue the POWs who languish in the rubber dinghies.

market and a definite bargain. Well done Ocean for taking this brave step. Now it's your turn Nintendo – lower the prices as Sega have done, or you'll lose the console war!

▷ The guardian at the end of level two is a massive battle station.

## ANDY

Damian might only remember a *Choplifter* clone on the C64, but I remember the real thing – terrific gameplay, but lousy graphics. Now Ocean have updated the Broderbund classic in style – terrific gameplay *and* terrific graphics! It only takes a few seconds to figure out the controls, then it's all systems go as you swoop your gunship over enemy troops and shower them with napalm. Yaaa-hoooo! Just like Vietnam, man! (Sorry.) In a concession to the Nineties, the inevitable bosses have crept in, and there's an armoury of shiny new power-ups, but the game plays just as well as it always did. Rescue your Super NES from overpriced dross with this fast and furious blaster! Now, how about an update of *Choplifter's* follow-up, *Raid on Bungling Bay*?

△ Level three is set in a war-torn city. Dodge in and out of the buildings.

◁ Whoah! A battle hovercraft attacks!

## DAMIAN

So far, Super NES owners have only had one choice when it comes to boxing games, and that was *Riddick Bowe* (George Foreman's is far too bad to consider). Now, *Legends of the Ring* (originally from ElectroBrain in the US) has arrived, courtesy of Bandai.

The game features an exhibition mode (for one or two players), boxing legends match, and of course the career mode. The latter allows you to create your own boxer, including colour of skin, fighting style, knock-out punch, and you can also individually beef up moves to suit your repertoire. If you prefer attacks from the right for example, then add strength points to your uppercut and head punches on that side.

When all's said and done, you enter into fights with ten swarthy half-mutants who disguise themselves as professional boxers. When I think of boxing legends, the names Ali, Fraser and Henry Cooper come to mind, but *Legends of the Ring* totally ignores these bygone heroes and instead lets you play with the likes of Haggler, Hearns and Robinson. Not bad blokes, but hardly boxing legends!

**Punch drunk or panto?**

△ Never bet on the white guy.

△ Before each fight, the combatants are shown in a ringside ticket.

# BOXING LEGENDS of THE RING

The graphics are large and colourful; taking you ringside for the full gore, as every devastating, bone-shaking punch sends droplets of sweat and blood all over the ring. The boxers are for the most part well drawn, but only having one or two frames of animation for each move is a serious limitation. The worst of it comes when you try to get up after a knock-down, and your boxer goes from flat on his back to standing straight in just one move – almost as if he teleported!

This game contains some great features which set it up above all the others in my opinion. If you can forgive the Thunderbirds puppet of a ref, then you'll enjoy this game. I particularly liked the way the screen grows darker, the closer you get to unconsciousness, and the way your face swells and bruises as you get hit.

They've even managed to include the girls in bikinis between rounds which is often missed, but unmistakable whenever you

## KEITH

What a brutal, bloodthirsty and violent game this is, I love it!

Normally I am a pacifist but when one is confronted with something which can relieve stress in such an effective manner, you just have to play it over and over again to make sure every last drop of brooding pent up aggression is released. The thrill of poleaxing some of the best fighters ever to set foot on the canvas is unsurpassable. The graphics and animation are heavyweight standard, seeing Sugar Ray Robinson's face twisted and beaten to a pulp and then watching with glee as he crashes to the floor is almost overwhelmingly satisfying. The sound is gruesome, every kind of punch has an effect to go with it, whether it's a thudding overhead right or a wickedly vicious uppercut to the head, there is a suitably lethal sound effect to accompany it. If you're feeling a bit tense, then punch this into your Super Nintendo.

▽ He's down! After a severe pummelling, Kinikini hits the canvas in a dazed mass of flesh and bone.

turn on the telly. It may be sexist to have a (dodgy side of 40) woman with "Daily Mirror" plastered across her mammoth mammaries, but this is a simulation, and sims must be realistic and accurate – right?

Always a worthy addition to this genre is the career mode, but this one doesn't offer much scope for training or arranging fixtures. The closest you get to a gym between fights is a sad screen where you add red spots to punching power, stamina or chin, and this ruins the realism that, up until now, had seemed to be at the forefront of the programmer's mind.

Can any form of boxing be fun? *Legends of the Ring* is certainly enjoyable if you've got a few mates who you'd really like to beat up in the fast and furious two player mode, but fighting the computer is never as fun.

When compared to *Riddick Bowe*, *Legends of the Ring* is better because it offers the attraction of real pixelated blood. But more of a management function could have prolonged the one player's longevity. As it is, you will soon get bored of boxing, and only drag it out when you want to get rid of some aggression. ☹

△ What happened to Hearns? Oh, yeah – I forget to fight the other guy while I was taking this grab.

## RYAN

*Boxing Legends* has got to be one of the most realistic boxing games ever.

The attention to detail is fantastic, with digitised refs, models in skimpy bikinis and tons of blood! Although the action isn't quite as frantic as *Riddick Bowe*, immense satisfaction is gained from watching your opponent's face slowly become more and more battered as your punches take effect! I especially liked the way in which your eyes close over in the one player mode, thus making everything dark and difficult to distinguish. Despite its many plus points though, *Boxing Legends* is a little too limited in the career aspect for long-term enjoyment.

**RYAN**

After entertaining countless kiddies on the small screen for years, the Pink Panther has finally turned his attention to tinsletown in a bid for superstardom!

However, after arriving in Hollywood, the dumb feline thought it would be big and clever to deface the famous Hollywood sign in a blatant feat of self-publicity that would put even Dave Perry to shame!

As a result of this, Pink's reputation is in tatters even before his movie career inevitably bombs, and so he must evade the pursuit of legendary nemesis Inspector Clouseau, together with a posse of fuming Hollywood executives!

This is where the game begins, after bungling onto the set of Honey, I Shrank The Pink, the courageous cat must avoid the onslaught of giant rats, and find the secret exits which will instantly warp him through to other tongue-in-cheek film parodies which include Pinkin' Hood, Jungle Pink, Pink Chill, and Pinkenstein!

Concealed on these sets are numerous gadgets and power-ups which allow our hero to vanquish his foes with the greatest of ease. Should Pink collect the special toll cards, his path to the various sub-levels will be made easier by hopping on hooks; taking to the skies on a magic carpet, or just simply being allowed access to stairs and bridges.

The action in *Pink Goes To Hollywood* is typically platform, by which I mean that our hero runs, jumps, shoots and bounces in order to progress, Mario-

**Maybe he should have stayed put!**

style. Although some would argue that this format is dead and should be cremated, I've come to the conclusion that if the game is decent and playable enough, why shouldn't it be an alternative title to *Mario*? I am personally a big fan of platformers, however after playing *Pink Goes To Hollywood* for a prolonged time, I would hardly sum-up my experience as "enjoyable".

The graphics are generally tidy and at times beautifully drawn, and the animation of Pink is excellent, especially the way in which he struts along; seemingly oblivious of his predicament. In fact the only emotion on his cool features is as his eyes fix into a glare when trouble lies ahead!

The enemy sprites and scenarios are also well drawn, although they do lack the detail of *Bugs Bunny*; giving some of the levels a very simplistic appearance indeed.

△ Could this be Clouseau in an amusing disguise... I think so!

## THINK PINK!

In association with MGM Home Video, SUPER GAMER is giving you the chance to win two complete sets of Pink Panther films and cartoon videos. You could win PP's *Zaniest Adventures* and *Greatest Hits* (cartoon), as well as the classic Peter Sellers films *The Pink Panther*, *A Shot in the Dark*, *PP Strikes Again*, *Revenge of...*, *Trail of...*, and *Curse of the Pink Panther*. These videos can be bought for about a tenner from most video stockists. Two lucky SUPER GAMER readers can nab one of these complete sets by simply answering the following question and sending it on a postcard to *The Great Balls Pink Panther compo*, SUPER GAMER, 124 Old Christchurch Road, Bournemouth, Dorset BH1 1NF. Entries must be in by 10 May.

Q: What is the name of Inspector Clouseau's oriental manservant?

As we know, the first thing that springs to mind whenever the Pink Panther is mentioned is the catchy blues tune that accompanies his television antics. I'm happy to report that the renowned Henry Mancini theme plays a prominent part in this game, and doesn't even get annoying after many hours of play.

So what is the crucial factor that sinks this game well below the standards set by say *Mr. Nutz* or *Mario*? The playability – that's what. This game is just too damn difficult. Even the options couldn't toss a life-ring to the gameplay, as this only allows you to alter the number of lives and not the difficulty setting.

By difficult I mean that two brief encounters with an enemy will result in Pink kicking the bucket, and it often occurs within seconds of starting the game. The various warps are particularly infuriating, as you barely get enough time to find your bearings

before some unseen foe finishes you off! This isn't helped by the patchy collision detection and the clumsy manner in which Pink struts around the screen.

This problem doesn't cause any concern to begin with, as you can shrug it off and laugh at Pink's amusing death sequences, but after prolonged play and little sign of improvement – my temper was soaring to extreme levels. It's just so unfair, and entirely random.

The faults in gameplay are a pity, considering the potential scope that a character such as Pink could generate, and I can't help feeling that this game could have been so much better if the difficulty was tweaked to compensate for the younger players who *Pink Goes to Hollywood* is obviously aimed at. **S**

△ Watch your head! The pencil-limbed feline loses serious cool points for loitering under a falling anvil!

## ANDY

Doubtless it's a sign of lazy reviewing to have a go at a game for being 'just another platformer with nothing we haven't seen before', but *Pink Goes To Hollywood* is a definite example of lazy programming – there isn't the remotest trace of anything approaching originality here! Even newly-born babies would be forced to stifle a cynical yawn on seeing this. In *Pink's* favour, I do have to admit that the graphics are cartoon-perfect, but they're utterly let down by the tedious, unimaginative and downright unfair gameplay. *Pink Goes To Hollywood* is an annoying and unnecessary addition to the already glutted platform market, and I'd rather eat my own earwax than play it again.

△ This dopey-looking shark will have you for breakfast if you're not careful.

## DAMIAN

I've always found that the best way to review a great looking game is to play it in black and white. This eliminates any distracting visuals that the programmers may hope will win the game over, and instead concentrates on the all-important gameplay. *Pink Goes to Hollywood* in monochrome is intensely irritating and fails the test because the difficulty level is set way too high. The gorgeous cartoon-esque graphics are definitely a plus, but the collision detection with the other enemies in the game is abysmal and I found it very hard to get anywhere without superhuman enhanced senses. A brave effort, alas too unplayable to justify the high price tag.

Watch out for that plane! What pla...[boom]. *Desert Fighter* is like *Desert Strike*, but with jet fighters. In fact, this game (by American programmers Seta) owes an awful lot to EA's helicopter arcade smash. The graphics are similar, and it is viewed from the same perspective, but *DF* is far more involved, and this is why I loved it from day one.

# DESERT FIGHTER

**Even better than the real thing ('cos you don't get killed!)**

The plot could be taken from the Gulf War, except that to avoid any libel hassles from Saddam Hussein, the bad guys are not arabs with dodgy human rights records, but space aliens who are just using the pathetic humans for cover while they hastily invade the Earth.

The machines you fight are all conventional weapons, which is strange when you consider that if the aliens have invented a ship to cross galaxies, surely they could at least have built some sort of brain-disintegrating ray gun to finish the job?

Essentially you control the whole war and this is why the game is a great deal more fun than

*Desert Strike*. You can decide whether or not to use the A-10 Thunderbolt (good for ground attacks) or the most versatile fighter in the world – the F-15. You can also choose what to attack, and even change the course of the war with a single missile. This close involvement makes *DF* highly compelling, and there's nothing like provoking world-wide riots, simply by blowing up a civilian aid convoy by mistake.

## ANDY

Although this might look like a *Desert Strike* clone, there's a lot more depth here than in the aging EA game. The fact that enemy forces, if left unchecked early on, can cause immense trouble for the ground forces later, adds a certain strategic element lacking in *Desert Strike*. Obviously, liberties have been taken with reality in order to make the game a fast and exciting blast, but once you're in the thick of the action you don't really notice that your plane seems to have a maximum altitude of about three feet! It's been a good month for shoot-'em-ups – along with *Choplifter III*, *Desert Fighter* is a really smart game, which deserves to be in the cart rack of all fans of military mayhem. Ignore the drivel about aliens (first Hitler loses his moustache in *Wolfenstein*, and now this...), and drop a load of laser-guided bombs on Saddam today!

△ You're not supposed to blast these oil tankers and cause an environmental disaster – but it is damn good fun!

The war screen is the first thing you see when you first begin the campaign against the evil Zaraks. From here you can access the different types of aircraft, enter one of the eight war zones, punch up information on your next target, and of course dispatch to the hanger for take-off.

In addition, Global News Network (GNN) broadcasts will occasionally break between missions; depending on how the days events went. For example, if you blast your own guys, you will be publicly humiliated; alternatively, if you toast the aliens back to Alpha Centari, the world's media will call you a hero!

The graphics perfectly create the modern battlefield, with well detailed tanks, APCs, runways, oil factories, tankers, missile launchers, towns and even propaganda posters featuring Saddam's face (which changes to a frown if you shoot at it!). The various jets are smoothly animated and don't change their shape when they turn (as happens in many early shoot-'em-ups), and I liked the way that your plane begins to smoke when you get hit. What really makes this game so glorious to play though, is the widescale destruction that you can cause at just the flick of a button. Ha, ha - an arsonists paradise!

Pummel some missiles into an airfield and the buildings don't just explode and then leave a crater - they burst into flames and are slowly consumed by the raging inferno, then all that's left is a burnt-out shell. This is much more realistic, and provides some excellent moments, as you fly in and rain down bombs, before leaving the burning wreckage and flying on to the next target. Eat your heart out

*Desert Strike* - this has you licked in the glory 'n' guts department.

Sound is also excellent, with some *UN Squadron*-esque tunes that actually complement the action, as opposed to getting on your nerves like that damn Elton John and Rupaul number. You know you hate it, but can you get it out of your head - no?!

During play there are a number of great tunes that spur you on, and the music also changes to a more menacing tone when a MiG 29 tries to take you out. Sonically, there are also plenty of neat ditties during the war screens, missile launch 'whooshes', lock-on 'beeps', and I liked the jet engine whine in the background when you get advice from the burly colonel

△ GNN news live from the warzone.

▽ Here we see a smashed radar site (mission 1), with an enemy MiG hitting the ground at the top.

△ Mission 8, and you're sent into the capital city itself!

Trautman look-a-like before the big push. It has to be said that the mic chatter speech is fairly unclear, but who can understand it anyway (Cue Carling Black Label Dambusters advert punchline)?

The only thing I found wrong with *DF* is that there is not enough of it. True, it did take me a few days to annihilate the alien scum, but there are only eight missions to complete, and this is fairly easy if you don't decide to sight-see on the way. The scrolling could also have been a little faster, because although it's very handy for pin-point bombing runs – it takes an age to get from one end of the map to the other. In this

△ You two characters are going to Top Gun!

## KEITH

This is definitely my type of game: plenty of action, strategy and loads of playability.

Visually, it's similar to *Desert Strike* but with more detail, for example, towns really look like towns and even radar and SAM sites are instantly recognisable. I especially like the way that as you progress through the game, the war situation is being constantly changed and updated. You can even see your offensive line of tanks trundling towards the enemy below as you cruise around in the sky, dodging MiGs and missiles. One (worrying) psychotic tendency that can be exercised is the annihilation of your own troops – not advisable really as this does impede your war effort slightly. But there's nothing like carrying out your mission, slipping away from a MiG and returning to base with barely enough fuel. Pure adrenaline!

case it would have been better if you could decide where to start the missions from.

There you have it then, despite some minor niggles I have to say that *DF* is a stonkingly good war game with more than a smidgen of strategy mixed in for good measure. It looks and sounds great, and playability's not too bad either. Better than *Desert Strike* in my opinion, and a well-timed release for summer, because *Jungle Strike* by Gremlin will be out nearer to Christmas. Fancy some Saddam busting? Get *Desert Fighter* now and wipe that smug grin off his face! 

# PLANE SAILING

The war screen is the key to the whole game and so you better learn what all those buttons and lights mean.

This is the aircraft selection window. You access it from the right square on the war panel (bottom centre)

*Desert Fighter* is played in real time and so this date is very important if you want to know how much time you have left.

GNN news flashes, your commander, and any other guys who want a chat will contact you here.

Make sure you choose the correct weapons for your plane. The F-15, for example, can have three different payloads.

Hit the fist and you go straight to the hanger where a brutalising colonel will talk tough.

This square will give you information on the chosen mission area; including target details and hit percentages.

**RYAN**

I've never really been much of a Disney buff. Apart from those awful Herbie movies, my childhood was virtually Disney-free, and I've always preferred films with more distinction, more grit, and where the stars don't spontaneously burst into song at every opportunity! You may find it strange then, but I actually liked Virgin's Game Boy adaptation of the classic animated movie, *Jungle Book*.

You control Mowgli, the mop-topped kiddie with pencil limbs and a burning ambition to escape from the jungle and track down his long lost elders. As platform games go, *Jungle Book* trundles along slowly to begin with, but as you progress through the leafy levels it quickly gathers momentum, and I was really enjoying it by the end of the third level!

Your basic aim is to collect a certain amount of gems that lie scattered around each jungle scene. This sounds straightforward, but the truth is that many of the gems are obscured by foliage, hidden on high branches, or simply nestling in the belly of the cheeky chimps or venomous cobras which must be pelted with boomerangs (your only weapon) before you get the loot.

*Jungle Book* features all the foolhardy characters from the film such as Baloo the bear, King Louie and...er, the others (he said trying not to betray the fact that he knows nothing about the film)! Each one crops up in cameo to assist or hinder the young tyke. As we all know, no platform game would be complete without a hefty bundle of power-ups and bonus items to collect, and in this department *Jungle Book* excels; offering a huge abundance of energy-replenishing fruit, multi-directional boomerangs, invincibility masks, and a special shovel, one of which is hidden somewhere on each level. If collected,

# the Rumble in the Jungle!

# JUNGLE BOOK

**ANDY**

Amazing – a movie licence that manages to be a platformer *and* playable! I thought that was impossible, but Virgin have proved me wrong. *Jungle Book* pulls off the tricky balancing act between playability and challenge with ease, dragging me back for another game of banana-lobbing mayhem time after time. The levels are large and detailed (I loved the Dawn Patrol stage, with the marching column of elephants), the creatures you meet are all instantly recognisable as the Disney characters, and even the music's halfway decent! The game only has two flaws – one is the screen blur, which is unavoidable on scrolling Game Boy games, and the other is that *Jungle Book* has the bad luck to be ranged against the even better *Warioland*. Don't let that stop you buying this, though. In fact, why not buy both?

▽ If you collect the shovel, Mowgli will dig into a secret cavern once the level is complete.

◁ "Ride that current, dude!" Mowgli drifts downstream on a friendly turtle. Don't fall in, though, or it's curtains for our hero.

this will access a special bonus room once the level has been completed; giving Mowgli the chance to increase his score.

When I started playing *Jungle Book*, I anticipated it to be 'just another platform game', however, I was pleasantly surprised by the amount of variation in each level, and the skill required to fulfil your goal. Whereas most other Game Boy titles fall into the trap of being too similar throughout, *Jungle*

△ Not so cute now, is he! Use your invincibility mask and aim for his head.

▽ Ahhh! It seems a pity to wake him, especially when you only end up killing him anyway.

△ Tut tut, that's not a very hospitable way to welcome a hitch-hiker! Avoid the elephant spit by jumping as soon as you see his trunk twitch.

*Book* is pleasantly original (considering the tired format on which it's based!).

My only real quibble is that I found the control method unresponsive to the point of tedium, mainly due to the fact that Mowgli never seemed to jump or move in quite the way I expected. This made the action very unpredictable and at times frustrating, especially when Mowgli would stop in mid-jump and sink helplessly into oblivion.

Graphically, *Jungle Book* is superb, looking extremely polished and well presented. The animation, especially on the swinging sections is brilliantly effective and in my opinion some of the best on the Game Boy! The thumping tunes are also of a high standard; managing to recreate the annoyingly unforgettable soundtrack of the movie.

As a Disney tie-in, you can't go wrong with *Jungle Book* – the levels are huge, the music is highly atmospheric, the graphics are ace, and the gameplay is a joy to behold. If you've got a Game Boy – it's a bare necessity!

## DAMIAN

Go on Virgin – give yourselves a pat on the back! *Jungle Book* is proof that Game Boy games are just as, if not even more, playable in most cases than Super NES games. The graphics are great, but *Jungle Book* suffers from the usual bugbear of blurring when you run. This isn't so bad if you are playing in good light, but it does strain the eyes if you are just casually grabbing a few minutes play on the train. Apart from this, the most outstanding feature of *Jungle Book* is the groovy music from the film. The first level has the great "I wanna be like you" tune bopping along behind the action, and this really enhances what is a top class movie game. *Jungle Book* should be in your collection now!

After a few years of wandering around au-naturel and feeding on roots and shoots, Mowgli naturally began to crave a taste of the good life, and so set out on a quest to find his parents. You may have already guessed that I have never seen the Disney classic on the big screen; judging by my crude interpretation of this classic story, however, to appreciate Virgin's NES tie-in, knowledge of the film is a mere triviality!

## GAMER GOLD

△ The animation on Mowgli is stunning, especially when he swings on the vines.

Obviously taking into account the importance of the film's musical elements, *Jungle Book* recreates the classic tunes almost perfectly, in fact I found my foot tapping uncontrollably to "The Bear Necessities" for days after! The sound effects are mainly of the "Boop", "Whoop" variety, but are often paled into insignificance by the excellence of the thumping soundtrack.

Despite how drained the NES platform game situation is, I thoroughly enjoyed playing *Jungle Book* and I just couldn't seem to tire of swinging on vines, duffing-up monkeys and riding convoys of elephants – in short I was totally hooked!

Okay so it may not be the most original game around, but *Jungle Book* makes up in style and playability what it lacks in originality. Even the tricky control method that bugged me in the Game Boy version has been rectified, so this time I have nothing to blame for my failures!

# JUNGLE BOOK

**A bare necessity!**

*Jungle Book* looks and plays pretty much the same as the Game Boy version, the only apparent differences being colour, of course, and a slight difference in the layout of some levels.

Although the graphics are generally of high standard, the backgrounds do become a little repetitive after a while, however it's the central character that totally steals the show! The animation of Mowgli is simply exquisite and he moves with such convincing grace and speed that you could almost con yourself into thinking that you're watching the film... well, sort of!

Mowgli's jungle friends (and foes) also make cameo appearances to increase the atmosphere and add a sense of excitement to the proceedings, and it is good to see Virgin making this adaptation so true to its celluloid counterpart.

△ Oh crikey, it's the Blair-Stare! Mowgli finds himself in a sticky situation!

**KEITH**

Great, another NES platform game – there's not many of them around, are there!

*Jungle Book* doesn't really contain that much that makes it stand out apart from one factor – it's extremely playable and for me that is the most important part of any game, therefore I have to recommend it. As far as graphics go, they look very much like the characters they're meant to be. Mowgli is wonderfully animated, he leaps, swings and jumps in a convincing manner and is very easy to control. The NES market is a bit lifeless at the moment so bring your NES back to life and buy this now!

# UTOPIA

**KEITH**

According to Sir Thomas Moore, Utopia is a place of beauty, serenity and harmony; the perfect society, some say the ultimate goal of mankind. In this game it's up to you to create this imaginary wonderland.

You are supreme commander of a colony whose task is to live and prosper on ten planets in the universe. Once you have attained a reasonable standard of life and defeated the indigenous aliens who had the gaul to be living where you wanted to build a city, you fly off to the next planet and the whole process begins again.

Your colony must be made up of certain types of building, most important of all are the control centres, life support systems and living quarters. Without these, your Utopian dream will quickly wither and die. There are other buildings, such as chemical plants, tank yards, stadiums and power stations – all of which are represented in fairly small yet detailed 3-D graphics.

Unfortunately, because of the angled view, the screen occasionally becomes far too cluttered, and this means vehicles and tanks are often obscured by other structures. I think it's a toss up as to whether this, or the grating in-game tune that drones

**Could it be the offices of Super Gamer?**

△ These are the buildings you can choose from when you first start playing. As you progress, scientist can produce new buildings and facilities.

throughout, is the most annoying factor in *Utopia*.

Apart from the music, there are absolutely no other sound effects in the entire game – could this be because in space, no-one can hear anything?

As commander, you have many advisers who help you with your decision making, and they will talk to you about many aspects of your colony including; finance, health and defence. You can ignore their advice if you like, but as I soon learned, shun them too often and you'll be kicked off your rock without even so much as a space suit for company.

In order to sustain growth, a balanced economy must be created – ie, you must make enough money to keep up the standard of living and suck enough money from your treasury to finance other departments such as exploration and defence.

Having a powerful army at your disposal is paramount in order to survive. Initially your

▽ Could it be Blake's 7? No, there's only six of them, so it must be your trusty team of advisers.

arsenal will consist of a few laser turrets and maybe one or two tanks, eventually the ultimate defence will include a massive battle cruiser, but this takes years of research and development. Your tech level starts at one and as this increases (by building laboratories), so your ability to create more destructive death tools escalates.

Talking of defence, one of the nice things about the game is that you are given about 20 years to build on the early levels before any attacks are initiated by the alien forces. This is a welcome time scale, as it gives you plenty of time to build up your colony and work out what the hell is going on. Games like *Metal Marines* offer no such luxury!

*Utopia* is only for gamers who have a galaxy of patience, but it will ultimately reward you with enough challenge and ingenuity to last a lifetime. The graphics are great, a definite improvement over *Populous*, and the depth of detail is truly astounding. I lost considerable amounts of time playing *Utopia* and never even noticed it, buy this, and you will too! Highly recommended if you like this sort of thing.

## RYAN

*Utopia* is one of the most detailed and compelling strategy games I've played in a long time. The graphics are mainly from the *Populous* mould with great attention to detail in places, although things can get cluttered at times. *Utopia* is rather like a Jive Bunny record in the sense that you always think you won't like it, but prolonged playing will undoubtedly cause your foot to tap along uncontrollably! What I'm trying to say by this analogy is that you don't have to be a strategy fan to get into this; a couple of hours play is enough to get anyone hooked. I strongly recommend *Utopia* to anyone seeking an awesome challenge, however, don't play it unless you've a lot of time on your hands!

△ The most important task initially is set up your defences, these laser turrets will help.

▽ The scaffolding shows buildings currently under construction. Most of them take about 30 days to build.

## DAMIAN

Like *Populous*, *Utopia* is for die-hard strategy fans only. There are no arcade beat-'em-up sections, just pure civilisation building and people management. While these type of games usually bore me to tears, *Utopia* is incredibly compelling and fun to play. The future element means within hours you can have rocket ships and star bases all over the planet, and I especially liked the ranks of armoured tanks that can be assembled to fight off the aliens. If you liked *Populous*, get *Utopia* now – it'll last you absolutely ages!

## KEITH

The *Chaos Engine* is a conversion of the Amiga game which was released last year.

Basically, it's an overhead scrolling shoot-'em-up along similar lines to that old classic, *Gauntlet*. One of the main selling points of the game was the brilliant artificial intelligence programmed into the enemies and your computer controlled partner. The team behind the game (Bitmap Bros) have also been responsible for massive hits like *Speedball 2* and *Gods*, so you come to expect high quality from them, and I have to say that they haven't disappointed.

The *Chaos Engine* is set in Victorian England, where Baron Fortesque's lust for knowledge and power eventually leads him to create the ultimate monstrosity – a machine which alters time and space, and changes normal people into ravenous wolves – *The Chaos Engine*! It is your

Some heavy duty topary work is needed to destroy this hedge. Pick up the key to the left.

Once enough nodes have been activated, the exit gate opens.

A set of keys has given this thug access to a useful little bonus room.

This level, suitably entitled 'The Beginning', is the first part of the game. Above are a few hints and some things you should look out for to aid you in your mission.

task to assemble a band of hardened mercenaries, find this abomination, and destroy it to save the world.

You start your quest by deciding which two warriors will form your team, one of which you will control, the other is the computer or player two. There are six fighters to choose from, each of them has a specific gun suited to their particular style, and different attributes such as speed, health and wisdom.

Wisdom is very important to look out for when choosing your computer controlled opponent – the higher the wisdom level – the smarter the character. This means he (only beefy

## RYAN

The *Chaos Engine* looks great, with detailed sprites, and stunning scenarios.

However, the gameplay is a rather tired and repetitive affair, being very reminiscent of the old *Gauntlet* games. If you like this sort of thing then I have no hesitation in recommending it, although in my opinion it plays second best to *Zombies* in terms of excitement and style. The intro music is excellent and the various screams and gun effects in the game also do well to convey the atmosphere, but in the long-run this game doesn't really offer much in the way of originality. Not bad, but *Zombies* has already established itself as the cream of this genre.

## ANDY

The *Chaos Engine* may be an unmatched classic on the Amiga, but on the Super NES it faces stiff competition from Konami's *Zombies*, and in most respects it comes off second-best. The 'steampunk' setting is unusual and interesting, and the various characters and weird mutants have that characteristic Bitmap Brothers 'look' about them, but the game itself is, in essence, a Victorian *Gauntlet*. Trog around, shoot some freaks, collect keys, get hit by lethal baked potatoes (well, that's what they look like), shriek as you die within seconds, curse at the horrendous slow-down... Sorry, Microprose, but Konami win by miles on the maze-mayhem front. *Zombies* is the one for me!

brainless types need apply!) will go for power-ups, shoot more accurately, and even run away if things get too intense! This is a brilliant idea and you can use it to your advantage by keeping back on the harder levels and letting your partner take the flak. Inevitably however, he bags all the power-ups and the money!

The action is viewed from above and features some very detailed characters and backgrounds, with the distinctive Bitmap metallic sheen on everything. The aim of each level is to activate a number of nodes and open the locked gate at the end. You'll know when one is activated, as your player triumphantly announces "node activated". Dead simple, and "dead" is what you'll be if you are not careful!

Beautifully animated monsters appear immediately on all sides. Frogs jump, beetles dart here and there, and others just come at you with absolutely no mercy! When you kill a foe, with a slightly out of place explosion, they will drop some money, this is worth saving because you have the option of buying power-ups from the shop later on.

You can also find power-ups lying around, although these tend to be well hidden and often involve killing particular monsters first, or shooting false sections of wall. There is absolutely tons of secret stuff to find and the methods of discovery vary from blasting walls to activating nodes in a certain sequence.

△ "Hey Gus, fancy a mercenary sandwich?" Our guy's gonna have to come up with something SPECIAL here, what can he do?

△ This screen appears every two levels and gives you the chance to change your sad soldier into a man tank, providing you've got cash.

△ Node activation can produce some spectacular effects.

The *Chaos Engine* consists of four worlds to explore and each of these has four levels. Unfortunately, I found that *The Chaos Engine* became a bit repetitive once I reached the third world. However if you're a shoot-'em-up fan then you probably won't be able to put it down. This is fine game, well programmed, smart presentation, and worth buying for its original storyline, but *Zombies* (viewed from the same angle and also a shoot-'em-up) is far better. Worth a look if you do not have a game like this in your collection.

**A flicker of light in the RPG corridor!**

# DUNGEON MASTER

◀ If you can find the correct key, then this door will open.

**DAMIAN**

I played the Atari ST version to death (well, until I got stuck), and I loved the fact that you could lose entire days playing it – and not even notice! To be fair, the graphics and sound are a bit duff here, and I think a heartbeat sound effect, in fact, more sounds in general, would have made this a much better game. The menus are clumsy to use because it is too much of a chore to constantly ferry items from one bag to the next in order to survive. In the end you use the wrong item because you can't be bothered to search everyone's gear for the right one! *DM* is a great game if you're into this sort of thing, and strategy fans will love it, but you had better make sure you are one of those people in the shop first.

**KEITH**

At last – it's been eight years since *Dungeon Master* was first released on the Amiga and Atari ST. The storyline is not particularly original (although it may have been when it was first released), so briefly; Lord Chaos has taken over the land, you as *Dungeon Master*, must guide four adventurers through various battles and puzzles in order to retrieve the Fire Staff and defeat Lord Chaos.

There are 24 characters to choose from, these range from vicious Lizardmen to small magic-using Pixies. Every character has three attributes, these are Health, Stamina and Mana. A character who is high in health and stamina will make a good fighter, so stick him at the front to cover the wizards, whose main requisite will be a high mana rating and can be used to conjure spells such as fireballs and lightning bolts, while the beefy guys let their axes do the talking!

▽ The battle is not going too well for Hawk, who has just been reduced to a pile of bones.

**PARTY HEARTY**

The key to success with *DM* is choosing the correct combination of characters in the Hall of champions. A good mix of Fighters and Magic Users is the ideal party composition.

**ELIZA**

**H: 60  
S: 58  
M: 22**

The best Priest in the game, respectfully known as the Lion of Yaitopya.

**HALK**

**H: 90  
S: 75  
M: 0**

This guy is an all-out Fighter. Put him at the front where the action is.

**HAWK**

**H: 70  
S: 85  
M: 10**

A very strong Priest, he hasn't much magic power, but plenty of brawn.

**LIAFLAS**

**H: 65  
S: 50  
M: 12**

This Elven Warrior can throw a few fireballs and handle him self in a fistfight.

The monsters, of which there are plenty, are not that impressive graphically, and the animation is badly limited to just a couple of frames. Although varied, the baddies you face are somewhat two-dimensional and the way you can sidestep around them is highly unrealistic.

Luckily, all the items portrayed in the game are sufficiently well drawn to be identified from a distance, and this is vital when you have to spot a key on the floor from 20 paces. Other details, such as the secret switches that reveal hidden rooms and alcoves, are clever

△ The character screen which informs you of your players' vital statistics.

and add an extra 'surprise' factor to what is otherwise a pretty mundane exploration game.

Sound is used with a fair amount of thought, and this is essential when attempting to create a creepy atmosphere. I liked the way that as you wander through the dungeons, you are always aware of constant dripping water; echoing through the halls and raising the hairs on your neck. It's just a shame that most of the other sound effects are terribly poor, particularly the blood-curdling war cry of the mummies – it sounds more like a kitten mewing!

DM is a big game – no doubt about it. There are 14 levels in all, the first few are fairly straightforward and present the perfect learning curve, but they eventually become extremely cunning, with mind-bendingly devious puzzles. There are switches to press, pressure pads to stand on, characters to resurrect and keys to find.

What makes DM fun to play, especially if you are an enthusiast, is that you never know what lies around the next corner and how you are going to cope. Each maze is absolutely huge and will take you ages to complete, and the key is successful management of your party and effective battle and spell techniques. In this game it's the survival of the fittest, and there are no medals for second place. Luckily, you can save your progress with a very handy battery back-up save option, then you can return to exactly the same point from where you left off.

DM is a good game, but it will only appeal to hardened fans because it is not as instantly accessible as *Might & Magic 2*, and you are restricted to the same old dungeons which can get repetitive after only a short while.

## ANDY

As another ST veteran, it was good to see the return of a familiar face, but it was also disheartening to see how much technology has moved on since I played *Dungeon Master* last. Compared to *Jurassic Park* and *Wolfenstein*, the step-by-step update is frighteningly old hat, and the lack of variety in the dungeon environment (you want grey stone walls? We got 'em!) shows up the age of the game even more. However, the fact that *Dungeon Master* still manages to remain enjoyable is a testament to the depth of the original gameplay; it's very easy to get lost, in more ways than one, in those dank corridors. Without a mouse, the inventory system is a lot more cumbersome than on the original version, but once you get the hang of it there's plenty of mummy-mashing fun to be had.

## Let's go clubbing! **PREHISTORIK**

**KEITH**

It's hard to know where to start when reviewing platform games, as there are so many of them around – it's a case of discovering exactly what's in the game which makes it worth buying. I am pleased to say that *Prehistorik Man* has some well thought out and original gameplay elements which give it an edge.

The story is a simple one (well, it has to be for Keith to understand it – Ed). A village of cavemen has run a bit short on comestibles, so they've chosen one particular starving neanderthals to go out and gather as much food as possible for the rest of the village. This tribe must survive on a fairly hefty diet of fruit salads that must be collected from bushes and trees.

There are 17 levels, ranging from mountains to forests, and all of them are portrayed in highly detailed and textured graphics that prove just what a good job the humble Game Boy can do when programmed properly (the title tune is irritating, though).

Apart from the graphics, the best thing about this excellent platform game is the original approach to each level. Dotted throughout the adventure are levels that pit you against hang-gliders and snowboards, and this breaks up the usual 'run along to the right and jump a few times' action that plagues most platform games.

# MAN

△ PM's entered 'The Hopefuls' on The Word. Go for the navel, matey!

Our prehistoric buddy charges through the level with a comical, yet purposeful look about him, and the game reminds me of the old *WonderBoy* coin-op. Each level is a lush tropical paradise and despite the high detail on the backgrounds, *Prehistorik Man* never slows down.

As for the bosses, well you've never seen anything like them – the dinosaur, monkey and Pterodactyl, to name but a few, are absolutely enormous and certainly up the to standard set in *Link's Awakening*.

Generally, *Prehistorik Man* is a pretty tough

game, but once you've defeated the enemies, most of them don't reappear. This is helpful if you die and have to start the level again because it is much easier to get through. Ultimately, this all adds up to a highly playable platform game. I can't think of many better for the Game Boy – it's well programmed and professionally presented, so give it a try. ☺

**DAMIAN**

I'm not usually a fan of Game Boy platform games, but *Prehistorik Man* really turned

my head. The music is some of the best I've ever heard! A rocking cacophony of noise that Rob Hubbard would have been proud of. The graphics are lavish, with some great dinosaurs, although the animation is terrible, with Brontosauri leaping as high as gazelles! The levels are large and fiendishly constructed, and I liked the dynamic messages that stretch and warp all over the screen as the graphics are pieced together at the beginning. Class stuff!

Like *Fatal Fury* before it, *Art of Fighting* was hugely successful on the Neo Geo, so successful in fact that some bright spark thought it would be a good idea to convert it! Quite a task, methinks, considering the fabulous graphics and overall presentation of the original.

The game offers three modes of play including one and two-player Vs, which means that you can pit any one of the ten different fighters against the computer or another player. The motley crew of gruesome degenerates includes lanky kick-boxers, burly pub thugs, and the token well 'ard lady!

Like most other beat-'em-ups, each fighter has an arsenal of assorted combat moves and several special moves which can be learnt and mastered with time.

The third mode of play is Story, which basically tells the flimsy tale of two brothers out to find their kidnapped sister, which naturally consists of kicking seven bells out of any dodgy-looking geezers they stumble across!

In all honesty I hated *Art of Fighting* to start with. The controls are unresponsive and the sprites lack any convincing movement whatsoever. However, after playing for several hours, things began to pick up. The bonus rounds are particularly intriguing, as each of the three different tasks gives your fighter the opportunity to power-up their fighting skills – a novel touch which gives progression new meaning.

If this is art then I'm Harold Steptoe!

## ANDY

I can see the *logic* in converting games from the Neo Geo – after all, who'd be insane enough to pay more for just one game than the cost of a Super NES? – but I can't see the *point*, as for all the trillions of megabits involved in the original games, they aren't actually any good. *Art of Fighting* is a mediocre clone (no, let's not mince words – it's a complete rip-off) of *Street Fighter II*, offering absolutely nothing new as far as the moves go, and possessing all the addictiveness of Lem-Sip. Only mad people buy Neo Geo games, but only sad people would buy this in preference to *Turbo*.

<| Cor blimey, Ryo's got a fireball move. I'm not being picky, but I have actually seen this somewhere before!

▽ Smashing the ice blocks will increase your power level... a nice touch.

As well as your normal energy bar, *Art of Fighting* also displays a second one which indicates the fighter's 'Spirit' level. Whenever a player executes a special move, this meter will deplete; leaving you susceptible to enemy attacks. A clever way of evening the score when your spiritual level is low is to taunt your opponent using a special 'RAZ' button. A barrage of demoralising insults will sap your foe's confidence and render them a useless vegetable... or something!

## SELECT BONUS GAMES

USE CONTROL PAD TO SELECT BONUS GAMES AND PRESS X BUTTON

Having snatched a glimpse at the Neo Geo version, it's apparently obvious that many of the stunning back-drops of the original have lost vast amounts of detail. A minor criticism perhaps, but this lets the visual element down, and going back to what I said before about the sprite animation – it has to be said that *Art of Fighting* has very little going for it in the graphics department!

The sound, on the other hand, is marvellous. *Art of Fighting* contains more chilling "grunts", "groans" and "hoahhs" than any Bruce Lee film, and the bass-

△ In a scene reminiscent of *Bloodsport*, our hero defies gravity like Van-Damme!

kickingly soundtrack to accompany them is immensely effective when turned-up to room-shaking level.

I have no hesitation in recommending *Art of Fighting* to die-hard fans of this genre as it contains more hidden moves than most other games on the market. But if you're like me and you derive perverse pleasure from thrashing a few unfortunate souls on *Turbo*, then you'll probably be turned-off by the amount of time, energy and patience needed to gain any satisfaction from this cart.

But on the other hand, if you want more from your beat-'em-ups and don't mind sacrificing the graphics and playability then this is the game for you, it certainly delivers more long-term blows, but is ultimately overshadowed by the fact that *Street Fighter II* is a thousand times better!

▽ This map of a down-trodden metropolis plots your next destination.

△ A man, who isn't anything like Guile in the slightest, gets hit by someone not using a dragon punch.

△ Select one of the three bonus stages and perform the task in hand to power-up your fighter.

## DAMIAN

Complete and utter unmitigated total pap! *Art of Fighting* obviously learnt to play in the *Fatal Fury* school of slow-down, rubbish moves and sad graphics. I could glean no satisfaction from playing this game – the moves are nothing we've not seen before, the fighters move like they have ball and chains attached to their feet, and the whole game plays like a one-legged dizzy footballer playing on a constantly spinning block of ice. You get my drift? What really made me mad is that Takara seem to produce the same game over and over again, without noticing that every one gets terrible reviews. Another nail in the coffin as far as I'm concerned...

# SENSIBLE SOCCER

**KEITH**

Never have I seen graphics abysmal as this on a Game Boy! Luckily, I've played a few football games in my time and I can see through this shabby exterior into the quality footy game that lies beneath. I've always been a fan of *Sensible Soccer* on the Amiga and happen to think that there's still not a single football game among the stadium full, that comes anywhere near it.

This version, while not as good as the Amiga game, is still the best one player football game on the Game Boy. Now, I say one player because one of the major reasons why it's not quite up to scratch is that the two player game is totally missing. If ever there was a game made for link-up this is it, what were the programmers thinking of? Lack of time

maybe? Whatever the reason – it's going to detract from long term enjoyment.

Don't get me wrong though, you're not going to breeze through this in a hurry. There is a cup competition to win and a league can be set up with varying amounts of teams. The options available are very impressive, you can toggle the

▷ Amazing goalmouth action ahoy as Pumpkinhead United take on Crispy Nuke-Test Stickmen City.

## Swerving balls and straight forward soccer!

sound between FX and crowd chants, turn the weather on and off, plus loads of the options you normally associate with footy games.

At first *Sensible Soccer* is very hard to control and doesn't have the instantly accessible play method used in games such as *Striker* or *Super Soccer* on the Super NES, this is because the game is realistic. The ball can be moved up field, but it doesn't stick to your feet as with the majority of football games played by shandy drinkers and netball players – you've got to use tactics. As El Tel would say, "pass and move" – there's no room for donkeys here and precision is what's needed. Any 'hit and hope' tactics will be sorely punished.

This is Game Boy football at its best and must be bought, but beware numb skulls – this is the thinking man's football game.

◁ The best graphics in the game. Fact!

▽ Hordes of extras line up for the British Airways ad.

**DAMIAN**

I must say that a Game Boy game has never made me laugh as much as this one – for all the wrong reasons. Sorry Keith, and Sony, but I think *Sensible Soccer* is one of the worst football games I've ever played (and I've played Anco's *World Cup!*). The graphics are abysmal, sound is nothing short of criminal – I've had more fun in a dentist's chair! When the players tackle, they look like dead dogs and to make matters worse, the over-sized ball moves at one fifth gravity and floats into the net without the goalie even noticing it! At least the lack of a two player option means only one of you will commit suicide after playing it.

## KEITH

▷ Has any one seen Buzby up here? I said I'd meet him at seven.

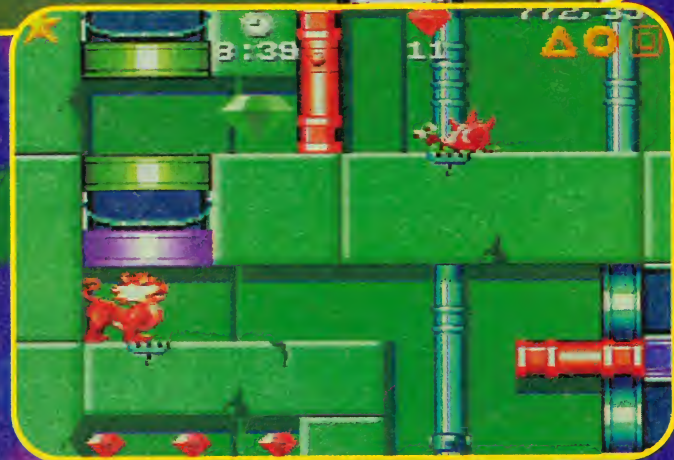

Picture the scene... an African jungle, tree canopies so dense the light barely sneaks through, creepers and vines hanging down tickling the thick layers of undergrowth that long for the refreshing caress of the sun's rays and the pampering patter of rain (get on with it Keith!).

Here in this self-imposed exile, Professor Putty has just perfected a technique of turning human beings into animals, using a spoonful of special serum and some clay. The local witch-doctors, however, decide they could use some of this themselves, and kidnap the Prof; leaving his son Clayton (ho, ho) behind as a small clay ball. Undeterred, Clayton sets off through

the jungle with the monumental task of rescuing his father and the serum.

Claymates is a tough game, but to help you along the way there are various different colour balls of clay which you can pick up; changing you into either a cat, rat, gopher, fish or bird. Some parts of the level map can only be accessed using one of these animals and you will normally be rewarded with plenty of goodies if you make it.

Once a level has been finished, collecting enough gems will transport you to an imaginative Mode 7 bonus game where extra

*A bit of clay goes a long way!*

# CLAYMATES

## A PACK OF MATES

Each one of these animals has their own particular ability. Doh Doh can fly short distances, and Mukster defeats enemies with a quick flick of the paw. Oozy stuns the local wildlife with his deadly breath and Goopy is adept at passing through any underwater sections. Globmeister is a fearsome fighter with his endless supply of nuts, and Clayton the ball can pack a steamroller of a punch!

lives can be won. Another bonus game involves jumping in the air at the end and attempting to hit one of four letters with the intention of spelling "CLAY."

After ploughing through the level and sampling any bonus games on offer, you are then confronted with a simple *Goof Troop* type puzzle game. This involves guiding two robots around a maze with the aim of destroying obstacles in order to progress though to the next stage. This makes for a pleasant break from the platform action and ensures *Claymates* has plenty of variety, but is the main game any good?

Most of the levels are absolutely enormous and include stacks of bonus rooms, hidden boxes and other helpful objects such as rising balloons, fans and high speed tubes. *Claymates* is played at such breakneck speeds, it's hard to keep track of the amusing and interesting items that scream by.

The graphics are immaculate and feature the highly acclaimed claymation technique, first used in *Clayfighter*. This made me wonder whether the characters featured in *Claymates* were in fact unwanted cast-offs from *Clayfighter*? Visually, you can't take anything away from this game – it's colourful, well animated and includes many a curious enemy ripe for the offing.

Where it does suffer though, is with the control method. I found it very similar to *Roadrunner*. When I attempted to jump on to a platform, the sensitive control method meant

▽ Unfortunately, deforestation is called for to solve this puzzle.

▽ Dead or alive, you're hanging in this tree.

## ANDY

Damn! Just when I was getting ready to attack the next unfortunate platform game that I came across, in a devastating tirade at the state of the software industry, and explain that platform games are in fact tools of Beelzebub himself, *Claymates* ruined everything by being far too enjoyable to slag off! Ocean seem to have developed an uncanny ability to pick up top titles for UK release of late, and *Claymates* will doubtless ensure continued employment for their ESP guru for a while yet. Ignore all the identikit licenced rubbish floating around at the moment, this is what you should be buying; big, imaginative, playable and challenging, *Claymates* turns Bugs, Yogi and Pink into warm winter coats!

## RYAN

In my opinion, *Claymates* reworks the standards set by most platform games.

The graphics are exquisite, boasting ultra-smooth animation, bucket loads of colour and plenty of humour to boot. I particularly liked the way in which only certain characters can be used to complete certain areas of the levels, thus adding a strategic element to the proceedings. The sound is also a jolly affair, with up-tempo tunes and great spot effects. The icing on the cake comes between levels when you must guide a couple of hapless robots around the gardens clearing your path to the next level, thus breaking down the platform monotony and incorporating other elements. Brill!

△ Get a bit of clay to clean out your pipes, that will do the trick.

that the character veered all over the place and had to be right in the centre of the platform to stay put, which is very annoying in a pressure situation.

The sound effects are very polished and they are used in abundance (like the great dog bark), and the title music is excellent – what we have now come to expect from Interplay's products – and will leave you humming it without even knowing.

*Claymates* is without a doubt one of the finest platform games around, and the inclusion of the puzzle section and all the other novelties is a great bonus. The control method does let it down slightly, but I recommend it to platform fanatics. Just don't expect anything radical if you already have far too many games in this genre. ☺

**RYAN**

Jimmy Connors' impeccable tennis career has launched him to almost mythical status in tennis circles. This American power-house has 109 singles titles under his belt, and was firmly lodged at the number one spot for an incredible 159 weeks! Although it was inevitable that age would catch up with him sooner or later, I can think of no other fitting tribute than Ubi Soft's excellent new tennis sim.

Endorsed by the great man himself, *Jimmy Connors Tennis* literally kick-starts the doomed NES back onto form, and proves that it can still produce first rate and highly entertaining titles, even if the graphics seem primitive compared to the Super NES.

The game can be played head-to-head with another player, or against the computer in 16 different tournaments; ranging from the Australian Open to Wimbledon. The reward for being top dog in each contest is a rather substantial financial reward... that's all the motive I need!

# JIMMY CONNORS TENNIS

*Game, set and match, Connors!*

△ Net play may be fast, but it sure baffles your opponent!

If you're worried about having your face rubbed in the mud at these important meets, then fret not, because included in this package (to ensure that you'll be insulting the umpire with the best of them!) is a useful practise mode. This consists of being fed a chosen number of balls by a serving machine; giving you ample opportunity to practise the surprisingly varied amount of shots available.

Despite the limitations of the NES control pad, what with it only having two buttons and all, the programmers have overcome this problem by combining directional movements with button presses to achieve a wider range. I would advise that you try the practise mode first

to get used to the control method as this, coupled with the unbelievably fast action, can take some getting used to!

I was pleasantly surprised by the nicely detailed graphics (a feature which made Super NES Connors so appealing!), although the animation tends to be a bit ropery at times, the sprites move with convincing grace and accuracy. The collision detection is also spot-on, although the ball moves so fast, it usually results in randomly swiping your racket and hoping for the best. And yet, curiously, this didn't spoil my enjoyment at all!

Like most tennis games, the music is rather uninspired and the on-court effects

**KEITH**

Jimmy Connors, isn't he that geriatric tennis player that keeps gatecrashing Wimbledon every year? It's a surprise that his name is being tagged with this game, as his appeal has somewhat diminished in the last few years. This is a fine game though, and probably the best tennis game for the NES. The controls take a while to master, but this adds to the longevity of the game. There are also tournaments to be entered and prize money to be won. The graphics are fairly clear, although sometimes the line calls can leave you a bit bemused. Animation is smooth as well, which was quite a surprise considering the old hardware involved. The two player game is superb of course and there are plenty more options to be explored. All in all this is a first class game and well worth the asking price.

△ A nervous computer player awaits Connors' first devastating service!

are limited to a few ball noises, which I suppose I shouldn't grumble about, considering the overall quality of this release.

The sheer depth, playability and well drawn graphics instantly transport Jimmy Connors' Tennis to the top of the NES sports pile. It's fun, challenging and immensely rewarding once the mega-bucks start to roll in! The excellent two-player mode is just the icing on the cake. Nip down to your local Future Zone and buy a copy today, I guarantee you'll still be hooked when Wimbledon comes around again.

## DAMIAN

The only tennis game that holds any water with me is *Super Family Tennis* on the Super NES, and even then, my ongoing affair with this superb game is sporadic to say the least. *Connors* is a great NES game and no mistake. You may quibble that the graphics and sound hark back to the days when games were only 2K, but in my opinion – it's the playability that counts, and *Connors* has it in spades! The one player game is great, with different courts (albeit just different colours), countries to play in, and prize money to be won. But it is the terrific two player mode that had the SUPER GAMER team coming back for more at lunchtimes and after work. It's fast, fun and worth every penny – so dust off that NES and get back to basics with one of the best tennis games ever!

△ The crowd consist of cardboard cut-outs who remain static throughout!

▽ The clay courts are faster than the others, so try and avoid net play.

# CONNORS COMPO!

To celebrate the launch of what is undoubtedly the most accomplished NES sports sim for a long while, SUPER GAMER (in association with Ubi Soft) are offering you the chance to kit yourself out with some ultra-trendy Connors gear! That's right, this summer you could be guzzling strawberries at Wimbledon in your very own Jimmy Connors T-shirt and cap, as modelled here by our very own 'Mr Catalogue', Ryan Butt! We've got 20 of each to give away to any readers that can answer the following Jimmy-related multiple choice question, and get your answers on a postcard please by 10 April.

## Question

Jimmy Connors holds the record for the most singles titles ever won by a male player. How many is it?

- a) 2
- b) 10,001
- c) 109

Answers on a postcard to: Jimmy's Jazzy Gear, SUPER GAMER, Paragon Publishing, Durham House, 124 Old Christchurch Road, Bournemouth, Dorset BH1 1NF. All entries must arrive by 10 April and Umpire Damian's decision is final!

## KEITH

"Oh! It should have been in! Look at the state of my tip!" We've all uttered those familiar cries while trying to smash balls which seem to have a life of their own into small holes on a large green table, but does it work on the Super NES? The answer is yes, *Side Pocket* has brought all the enjoyment of the pub into your front room, without the alcohol, sadly. You even get a juke box with 20 different tunes!

△ Doubling up for a tricky attempt at the bonus star.

# SIDE POCKET

## Cue the music – let's play ball!

▷ This beauty appears at the beginning of the game, offering you a choice of games to warm up your tip.

There are four ways in which the game can be played: one and two player, two player 9-ball and trick shots. The most interesting has to be the trick shot mode. Once selected, you are confronted with 19 squares, each of which contain a trick. When the trick has been completed, the square is uncovered to reveal part of a

tantalisingly gorgeous woman.

Eventually, with a lot of practise, every shot can be mastered to reveal one of those obscure puzzle games where the squares must be moved around to arrange a picture – what more inspiration do you need?

The actual pool game is excellent, a myriad of special features have been included into the gameplay to give it just a little bit more appeal than your average game. The player travels from one American city to another, with the ball arrangements becoming gradually more challenging. Stars appear over pockets which will give you a bonus when a ball is potted into them, and bonuses are also awarded if the balls can be potted numerically or in runs. After playing the game for a while you realise that a couple of well placed shots into star pockets is actually worth more than potting all the balls normally!

The two player games are great fun, as you take it in turns to pot the balls in sequence, but I was disappointed not to find the two shots penalty when you foul. Although the tables are nicely coloured and drawn, the animation on the balls as they move is not as realistic or as smooth as *Championship Pool* by Mindscape.

The graphics aren't stunning by any means and technically it's no masterpiece, but it's the sheer addictive 'one more game' quality that appealed to me. The only gripe I have is that sometimes it seems impossible to get the correct angle, even when using the fine adjust, but then that's pool isn't it? This is the definitive pool simulation for the Super NES and leaves all others nestingly on the cushion as it flies into the top pocket!

## DAMIAN

There are only two pool simulations on the Super NES. The first is *Championship*

*Pool*, but although it looks good with its 3-D view and superb animation – it is totally rubbish because you cannot watch the computer player making his shots! I was a big fan of *Side Pocket* on the Game Boy, and I have to say that this is a pretty damn good conversion.

Everything a pool shark will need is here; including the pouting babes, the fast cars and some seriously sublime Sade-esque music playing in the background. If you like a few frames of pool as I do, get this... simply the best pool sim around.

**RYAN**

US Gold used to produce some of the best sports games in the world. Never was an opportunity missed to convert the latest sporting trend or world event such as the Summer and Winter Olympic games, and they even produced the fantastic *World Games*. The sports game was king, and many thought that US Gold were as good as gold.

*Snow fun, snow future, snow good!*

# WINTER olympics

△ Keep well balanced, otherwise you'll bail-out!

However, time and technology has moved on considerably since the era in which US Gold dominated and it seems that after the consistent brilliance of these early titles, it was inevitable that the creativity would dry up, and the same old guff would be reproduced for countless cash-in sequels. Sadly, this is the case with *Winter Olympic Games* on the Super NES.

What we've got here is ten events, including four slaloms that are ultimately too similar to hold interest. Each event requires quick reflexes, good timing and a lot of imagination, but what they lack is variety. The graphics range from passable (biathlon, ski jump), to laughable (luge, bob sleigh), with poor animation and infuriating controls to add to the tedium. We know that athletes wreck their bodies to achieve gold medals, but why would you want to do it for fun?

The main problem with *Winter Olympic Games* is that it wouldn't have looked out of place on the Commodore 64 eight ago, and there's nothing new in this feeble package that hasn't been done before... and better!

As there is very little variation between the events, the gameplay ends up becoming a joke. Who wants to buy a

△ Here's just one of the repetitive skiing events.

▽ A nice touch on the biathlon event is your magnifying sight.

£50 cart consisting of four similar slaloms, two similar luge events and a few other rubbishy events thrown in for good measure!?

To add kindling to the fire, *Winter Olympic Games* is riddled with annoying bugs to send the playability factor plummeting even further off the bottom of the scale. For example, when competing in one of the slalom events, I missed a flag and decided to end my go by running into a tree, however, to my utter surprise I didn't crash and instead skied horizontally through an entire forest!

Another joystick-snapping tedium factor is when you get disqualified in the ice skating for taking a corner a millimetre too sharply, thus missing one of the boundaries, and then the other competitors proceed to finish the event missing virtually every marker on the track!

**ANDY**

Oh wow, everything's going all wobbly... it must be a flashback! (The time: the mid-1980s. A beardless Andy McDermott is playing *Winter Games* on his C64. "Hey," quoth he, "nice graphics! Shame the game gets so repetitive after only a short time." He resets the machine and plays *Mercenary* instead.) Back in the present and finding *Winter Olympics* in front of me, it's almost as if monumental events like the Berlin Wall coming down, Thatcher resigning and Kylie Minogue topping the charts never happened. This game is a real antique; apart from the (slightly) improved graphics, this could almost be a direct port-over from the C64, and the gameplay is still as tedious and annoying as ever. (He resets the machine and plays *Mario Kart* instead.)

△ The Moguls event is accompanied by the theme music from "Bottom"!

◁ These badly drawn stick men indicate the exciting events featured in this package.

## KEITH

I must admit to being fanatical about skiing and a few other snow sports, so I did find this mildly entertaining for about a day. Unfortunately, the events soon become annoying and repetitive. There are far too many skiing sections in the game; they should have replaced a couple of them with some other olympic events just to add variety. Why a cockerel crows at the beginning of the Mogul event I'll never know! The whole game's a bit of a shambles, really, and offers nothing new from any other winter sports game.

△ Britain takes the gold, how moving!

warrants the ridiculous asking price. You will only scrape some tiny molecules of enjoyment from this game if you are absolutely mad on snowy sports. If you're not – forget it!

Even the ultra-slick presentation that was so dominant in the home computer series has failed them! Okay, so the opening ceremony is quite good, but throughout the game we're graced with badly drawn logos, sad cameo appearances by the official mascots, and dull sound. There's none of the glittery razzmatazz that surrounds the Olympics,

and rather than portray the winter games as the world-wide spectacle that it is, this sorry release conveys all the atmosphere of a wet weekend in Skegness!

It is always a bad sign when the feature list on the back of the box mentions highly impressive qualities such as "8 languages including..." and "16 countries to represent, including..." Sad city!

This is US Gold at their all-time low; avoid at all costs because if you're dumb enough to fork out for this, you'll be stuck with it from now until doomsday!

△ Super skating action ahoy... zzz.

# WINTER OLYMPICS GAME BOY

*Winter Olympic Games* on the Game Boy is a classic example of hurriedly released second-rate tosh, and it is a shame that this is the game that Blockbuster Video decided to promote heavily in their shops! The game consists of seven unplayable events including bob sleigh, moguls, ski jumping, biathlon and skating. The basic aim is to smash the records and win plenty of gold medals for your country.

With the exception of *Track Meet*, games of this genre have never really worked on the hand-held, and this is yet another of the great failures. In fact I'd go as far as to say that playing it is more of an ordeal than a pleasure.

The puny visuals are incredibly poor, with tiny sprites (that are much too small to stand-out), dull repetitive backgrounds and jerky animation. The main problem with event compilation games is that once you've played through them all, there's nothing to entice you back again, other than the desire to beat your previous record (wow). *Winter Olympic Games* lacks any long-term challenge and indeed fails to evoke any lasting interest.

Like the Super NES version, this is poorly presented and totally unplayable. If you're an Olympic fan then stick to watching it on the box, as this package possesses none of the atmosphere generated by such a mammoth sporting event. In short, *Winter Olympic Games* on the Game Boy is a complete waste of time and effort, not to mention a rushed product of what could have been a promising license. Avoid!  
Overall: 35%

Despite my gut-wrenching first impressions, *Winter Olympic Games* did grow on me for a short time once I began to master some of the skills involved in the events, however, this minor enjoyment was short-lived and hardly

**ANDY**

It's war! The battle for Earth is on, and you must lead the Colonial forces against the nasty Federal army, a group of people so evil they push to the front of the queue at the post office, find Noel Edmonds amusing, and eat their McDonalds burgers without removing the gherkin! Obviously, they've got to be destroyed, and, this being the year 2117, you've got the hardware to do it. Metal Marines, forward!

The eponymous Metal Marines are giant robotic exoframes, which form the main fighting force of your army. Backed up by a battery of various missiles, you have to use your troops to locate and destroy the enemy's bases while defending your own bases against the Federal onslaught.

△ Ha ha! The enemy bunker falls prey to a squad of Metal Marines.

*Metal Marines* is essentially a straightforward wargame, dressed up in Nineties clothes. A simple two-button control method lets you first of all construct equipment and defences, then unleash them on the Feds. Since your resources are limited, you have to juggle the available funds between weapons and defence – spend all your time building up an offensive force, and the Federation will be able to launch missile strikes with impunity, but concentrate on

▽ A pair of missiles set out on their brief, but exciting, journey.

# METAL MARINES

## Heavy Metal Blunder!

constructing near-impregnable defences and you'll find that the Federal army has done the same, and they've got more funds to begin with!

Launching an assault is simple – too simple, in fact. The basic idea is to send in a force of Metal Marines to destroy the Federal air defences, then fire off a missile barrage to wipe out the undefended targets. Leaving aside the obvious question as to how come the high-speed missiles

## USE THE FORCES!

Careful planning of your army's spending is essential if you're going to defeat the Feds. These ten systems are the basic building blocks of your offensive, and if used correctly, they're devastating!

### ANTI-AIR MISSILES

A wall of these on your island's shore is vital to hold off Federal missile attacks.

### ENERGY PLANT

You need energy to run your army, and you need these to provide it. The more the merrier!

### FACTORY

Increases the speed at which your weapons are built and re-armed.

### GUN POD

Close-range defence against enemy Metal Marine landing forces.

### ICBM SILO

Let's go atomic surfing! The ultimate weapon, these babies require a lot of energy.

### METAL MARINE

It's mobile suit mayhem with these monsters. These are your ground troops – use them well!

### MINEFIELD

Got problems with Marines landing on your lawn? You need a minefield, John.

### MISSILE

Ruin your opponent's day with these handy cruise missiles. Can be upgraded to fire two at once.

### RADAR

Used in conjunction with your AA missiles, these increase the accuracy of your defences.

### SUPPLY BASE

You need money, and lots of it, to build all the weapons, and these help stock up the piggy-bank.

△ At last! The ICBM silo is ready for a launch...

are taken out instantly by anti-aircraft fire, but the lumbering marine dropship strolls through unscathed, the battle sequences show up *Metal Marines* as being too limited to provide long-term entertainment.

The opposing forces are each located on a different island, so attacks always come from the same direction – no chance of launching any sneak attacks or outflanking enemy forces here – and there's no way to employ any neat tactical strategies. You launch up to three Marines (wow), they land in a specific area, and then clank about

△ ...and *thar she blows!* Prepare yourself for a very sad pun indeed.

## RYAN

Although strategy games aren't my particular cup of tea, I felt strangely drawn towards *Metal Marines!* I think this is because underneath my cool, laid-back exterior lurks a power-crazed fascist dictator, and the many tactical plays appealed to this side of my character. Although *Metal Marines* is easy to get into and is ultimately very addictive, in my opinion it could have benefited from a battery back-up option as opposed to passwords because once you start playing you'll not know where those hours go!

△ And it's good-bye, ruby shoes' day (told you it was sad!). Joan Bile (crazy name, crazy gal) takes offence at being nuked out.

## DAMIAN

I really enjoyed this game... for the first five minutes, then I discovered that it doesn't change at all. Countless missile attacks are blown out of the sky by the enemy's always superior firepower, then an uncannily accurate counterattack severs all my supply lines, destroys all my defenses and then toasts my remaining base! You spend the next five minutes trying to rebuild with barely ample Tory funds, before the enemy pound you again, this time with even more marines! Sorry, but this is far too limited and unfair. Like Andy says, it needs to be more flexible and realistic. A two player option would have made *Metal Marines* more fun in the long run.

until they've either destroyed everything in that area (after which they fly back home) or are taken out themselves. You can't drop Marines in an undefended part of the island and have them sneak their way towards a base – it's all or nothing in one small area, and if it's full of defences, you're in trouble! Nor can you split your forces, send out decoys or build a beach-head on the enemy island. The game is more akin to *Battleships* than any kind of strategic simulation.

Despite all the attractive graphics, the amusing cut-scenes where you get messages from the opposing generals, the jaunty music and the clever and effective user interface, *Metal Marines* actually contains very little strategy. The simplistic action soon becomes tedious; it needs more control and depth! There's still room for a truly great war game on the Super NES, but as it is, I'd go for *Powermonger* – or, better still, wait around for the conversion of *Dune 2*.

**RYAN**

Since Madden '94 arrived on the scene, American Football sims have had a tough job trying to rival its brilliance. Malibu's *All-American Championship Football* is another such game with a mountain to climb!

This game contains two basic modes of play, Exhibition Match and Season. The Exhibition allows you to pit two of the 28 NFL teams against each other in a single match played against the computer or with a friend, or in a season mode set over 18 gruelling weeks. Can you make it to the SuperBowl?

Out of bounds at the 17, the end is near! △

*All-American Championship Football* plays much like any other gridiron game in the sense that you choose your offensive and defensive plays from a scrolling menu with three different options displayed at once. You can then select your desired play by pushing one of three buttons, which is especially handy when playing against a friend, to maintain secrecy!

The action is viewed from an angled perspective, with the offensive team always attacking upwards. The sprites, although jerkily animated are well defined and reasonably big. However, in my opinion there isn't really enough to distinguish the different teams, apart from the colour of their shirts, and the absence of team rosters means that getting the feel of actually playing with your favourite team is fairly limited.

There is nothing fundamentally wrong with this game, in fact my only real criticism is in the kicking department. You know, those tense, nail-biting conversions which could determine victory or defeat – all is well until you attempt an extra point or a field goal and then you realise that the programmers are asking too much!

Once the ball is snapped you must wait for a meter to reach a reasonable level to determine the power and distance of the ball. By the time this meter reaches halfway

▽ Plays. Do you understand them? Nor do we.

## Arcade gridiron action

# ALL-AMERICAN CHAMPIONSHIP FOOTBALL

△ A touch down for the Oilers as a result of a stunning 62 yard drive.

**KEITH**

It's hard to play and understand a game like this when you have little or no interest in the real life version. For me every game involves a random selection from one of those ridiculous diagrams that look like a drunken pile of matchstick men (which I'm told are called Plays) and then rapidly pressing all the buttons on the pad to try and stop a player I can barely see. It may appeal to fans but not to me.

(the minimum amount for a long kick) your poor kicker is already helplessly flanked by defensive players and the chance of guiding the ball past a point-blank wall of six-foot beefheads is a physical impossibility!

I do think that this game would have benefited from a managerial element; allowing to choose your players and monitor their health and abilities more closely. But as it stands, this plays much like an arcade-style American Football game which most younger players will thrive on. A nice try, but Madden is still the undisputed King!

## ANDY

"Yee-hah, Jester's dead!"  
"This bogey's all over me!"

"You've lost that loving feeling!" (Eh?) Yes, it's *Top Gun* clichés a-plenty with *Turn And Burn*, an F-14 Tomcat 'simulator'. I say 'simulator' in quotes because, while a lot of time has been spent making sure everything looks suitably authentic, the game is as much like flying a real plane (which I have, before you ask) as a trip in Granny's Metro down to Tesco is like ten laps of Silverstone in a Williams-Renault.

# TURN AND BURN

Up there with the best of the best!

△ One of the bosses – an AWACS aircraft. Shoot its engines to down it.

## DAMIAN

Like *Super Battletank* (also by Absolute), the graphics in *Turn & Burn* are excellent – 16Mbits worth of well drawn and digitised sequences straight from *Top Gun* no less! Unfortunately, despite being superbly playable, I found it way too easy and incredibly repetitive after only a couple of goes. It's the same old, 'fly to some MiGs, blow them up in a few seconds, then take out the big boss who needs to be shot strategically to win' affair. The missions are varied, but the formula never changes, and so you quickly lose interest. Great graphics and sound, but shallow beyond belief.

*Turn And Burn* is more like *Afterburner* than anything else, but don't let that put you off. Depth is added to the basic MiG-zapping scenario by a mission system, where certain objectives have to be met before you can return to the safety of your aircraft carrier. Early missions have you simply blasting MiG-29s out of the sky, but later ones include strafing ground targets or hunting down enemy AWACS aircraft.

Trusty old Mode 7 is used to fling your Tomcat and the enemy MiGs around the sky (which on the sunset level looks absolutely stunning), and the attention to detail is such that the planes even have navigation lights on the wingtips! *Turn And Burn* is definitely a very nice-looking game.

It even plays quite well, too. The emphasis is on arcade action rather than simulation accuracy (the carrier landing is... well, 'sad' describes it quite fairly), and it's great fun swooping around the Mediterranean firing off missiles at all and sundry. I can't really see it being a game that you'd play non-stop for weeks, but in short bursts, it's a blast, and it should satisfy your need for speed.

# PAC-MAN

**ANDY**

Pac-Man, eh? Ah, a classic game of the early 1980s, which wasted many a 10p of my youth (keep up this nostalgia and you'll be history, Andy - Ed). Um, okay, the plot - you play this yellow ball with a big mouth, the titular Pac-Man, and you have to guide him round a maze, eating dots and avoiding ghosts. If you eat a power pill, you can temporarily turn the ghosts blue with fear and eat them. And that's it! There are no power-ups, no secret levels, no bosses... just a blob, four ghosts and a load of dots.

Yep, this is more bare-bones than a dinosaur dig, an absolutely perfect copy of a 14-year old arcade game forgotten by everyone except old farts like me. The question that has to be asked is "why?" Why dig up this old fossil now, in the age of virtual reality, *The Word* and TV remotes with more buttons than Burtons?

Possibly because it's oddly addictive, in a mindless sort of way. After all, Mr Namco wouldn't have become extremely rich if *Pac-Man* hadn't possessed the mystery 'one more go' factor. The only objective, as the maze never changes, is to beat the high score, but Keith and I soon found ourselves in a furious battle to hit the top slot. However, state-of-the-art it ain't, and at 25 quid, the price is frankly ludicrous. As a budget release, this would be well worth considering, but as it stands it's too much for too little.

▲ Get used to this view if you buy the game - you'll be seeing a lot of it!

**KEITH**

I've nothing against *Pac-Man* as a game. Okay, the graphics are abysmal, but it's still playable and surprisingly addictive. In fact I can play this for a lot longer than some of the platform games which are around on the Super NES! The problem that I have got with it is the price. How on earth can *Pac-Man* be released at this price when most NES games have been reduced to less than a tenner? If the price justified the content then I'd recommend it, but I'd think seriously about shelling out £25 for a 14-year old arcade game.

## MS PAC-MAN

Nintendo, £19.99

Also finding its way onto the shelves, after a mere decade, is *Ms Pac-Man* on the Game Boy. If you've seen *Wayne's World*, you'll know the difference between *Pac-Man* and this (she has a bow in her hair). Apart from slightly different mazes, the games are the same, so the criticisms of *Pac-Man* above also apply to his girlfriend. The Eighties revival starts here!

# THE PEACE KEEPERS

## DAMIAN

*Peace Keepers* is not a bad game by any means, and it does at least show some originality. The airport sequence with shadows from the overtaking planes is very atmospheric, and I liked the way that each level offers more than you first expect. The cells with the mutant experiments are extremely well done, as each scientist you meet is taken over. Unfortunately, the great graphics and storyline are marred by an annoying control method and some bad collision detection on the players. *Peace Keepers* is not as good as *Final Fight*.

*Taking the peace!*

## ANDY

Nasty old Mr Iago, head of the company that rules the world, has been carrying out genetic experiments to turn the population of Earth into mindless slaves – but, worse still, he talks in bad Shakespearean couplets all the time, so a team of Rent-A-Heroes™ set out to kick his head in. Since they foolishly forgot to pack their guns, grenades and other weapons of mass destruction, they have to punch and kick their way through Iago's armies of mutants in order to give the boss a good seeing to. Choose your stereotyped fighter (tough dude, streetwise teen, thigh-baring girl or, erm, Frankenstein's monster lookalike) and slowly trudge through level after level of

▽ No, the BLUE wire goes on the left!

△ "Can I take your jacket, sir?" Echo moonlights as a waitress at the Fat Git Club.

strangely similar-looking punks, thugs, mutants and fat blokes, confronting a boss at the end of each stage... sound familiar? Yes, folks, it's scrolling beat-'em-up time again! *The Peace Keepers* follows in the tradition of such 'classics' as *Double Dragon*, *Final Fight*, *Rival Turf*, *Streets of Rage* and so on, by playing in exactly the same way!

Actually, *The Peace Keepers* does offer a few features not seen before. Depending on which character is used and which direction is taken at certain points in the game, alternate routes to Iago's lair are available (some easier than others), and there is a four-player Tournament mode (for those of you with a Multi-tap) where you can take on your friends in a variety of arenas. This isn't the thrill it sounds, though – it might allow twice as many players as *Street Fighter II Turbo*, but it isn't half as good.

Let's face it, scrolling beat-'em-ups are all pretty much identical. *The Peace Keepers* might be bigger than most, but it doesn't play any differently to the others on the market. This game is part of a creatively long-dead genre, so my advice would be to skip it for something with a lot more originality.

△ So it's the same picture we used in the preview last month. So sue us.

**KEITH**

Mario's second educational adventure is set in the continuums of time. Bowser has nicked key historical artefacts like Joan of Ark's lucky shield, and Queen Elizabeth's crown. Mario, in his goody goody "I'm such a hero" mode, takes on the awesome task of travelling through time and recovering the objects to restore the time flux.

Complicated, you might think, but *Mario's Time Machine* is in fact incredibly simple to play and enjoy. In order to give back the artefacts, you must first travel to the time zone, asking questions to key figures and remembering the facts and dates. With this vital information, you must then fill in the gaps on a time sheet which also serves as a history lesson. Once the sheet has been filled, you get to meet the celeb and restore the item. There are 15 objects to return – can you stand the challenge?

First off, I better say that *Mario's Time Machine* is definitely for younger players only, although I certainly learnt a few new facts about ancient Greece and the War of Independence! The clever mingling of Mario game and an educational package is handled well here, but I have to say that the simplistic action soon becomes repetitive, especially if you are looking for *Super Mario V*.

The learning experience is broken up by a surfing type game, where Mario must collect ten mushrooms and then dive into a whirlpool which will warp him to the date programmed into the time machine. Without the mushrooms,

▽ Gandhi freaks out after realising his flag's gone.

Please not now! We were about to begin the Independence Day ceremony and raise our new flag, but there seems to be some delay.

Calcutta, 1947

Few political leaders have earned the prestige of Mohandas K. Gandhi. Born in India in 1869, he studied law in                      and settled in South Africa. There he protested unjust laws with campaigns called "                    " meaning "grasping for the truth." After some success, Gandhi returned to India in                     , a land ruled by the British since                     . Gandhi first sought cooperation, but after a British attack on nationalists, he organized non-violent protests against British rule.

**RYAN**

As an imaginative educational package aimed at the younger end of the buyers' market, *Mario's Time Machine* is witty, stylish and dare I say, thoroughly enjoyable! However, I have yet to be convinced of the actual demand for such games other than the fact that it keeps the parents happy. Surely time spent on your console is purely leisure and escapism. Do you really want to end up doing homework on it? If you're a young Mario worshipper then doubtless to say you'll be impressed by this bogus trip through time, otherwise it presents no real challenge and acts only as a key to unlock those useless segments of history that have been locked in your subconscious since exam day!

Mario is taken back to the castle, but this section is by far the weakest in the game. No substance, no sense. Mushrooms indeed – pah!

The game has been presented in a very light-hearted way and Mario chats to all the characters in an innocent, friendly and amusing manner, thus giving the impression that it's no lesson at all, more like a Bill & Ted romp through time!

Ideally, this game should be played by parents with their younger children, and it is certainly enjoyable. However, as an experienced gamer, I completed it in just a few hours, which says nothing for the long term challenge.

△ Mario defies the laws of physics and surfs without waves. Better have a chat with Isaac.

▷ This is the time machine – slick, huh?

**CHEATS**

Many of you will no doubt want a full run-down of the vast array of cheats available, so here goes...

**Sound Test**

Go to any level of the game and on controller one, press and hold Y, B, X, A, and Down. Then press Start to access the sound test screen.

**Title Rotation and Seven Continues**

Go back into the sound test screen and you'll notice that the message under the words "Sound Test" has changed. Keep repeating the trick until the message gives you two codes. One will tell you how to rotate the title (Y, Y, Y, Y) using the L and R buttons. The other will give you a code for seven continues (X, Y, A, B, X, X). Try entering both cheats on the Start/Options screen. If this doesn't work, turn the machine off and on, then try again... but do try!

**1-Up Loop**

Go to the big pit at the start of Hoth, drop in and push to the left to land on the invisible platforms. Now shoot the air to uncover a total of four 1-ups. Now simply chuck yourself off the edge onto the spikes and repeat the process until you've acquired a sufficient number of lives.

## Rebel Base 3-2

These flying Storm Troopers can pose a considerable threat if not killed early enough.

Han's escape from the Rebel Base takes him through more maze-like corridors. Take your time to explore the various dead-end passages as there are usually power-ups which need to be shot to become visible.

Kill the Storm Troopers as they emerge from the door, to gain extra energy hearts.

At last, the end is in sight! Han's final venture through the Rebel Base will lead him on to a devilish foe which wasn't actually seen until the final film. Obviously the programmers were a bit pushed for ideas!

This mechanical spider thing may look menacing, but in actual fact it's a doddle to kill!

# Asteroid Field

Despite the simplistic principle behind destroying a few TIE fighters, this level is incredibly tough! Not only must you target those damn evasive enemy crafts, but your path is also flanked by endless streams of pesky asteroids! There are basically two methods of completing this stage, you can either concentrate on the oncoming asteroids, shooting the enemy when they ven-

ture into your sights. By doing this you'll reduce the risk of sustaining heavy shield loss. Alternatively, try pushing diagonally up to the left. This will draw the TIE fighters into your path. Although this is rather long-winded, if you're of a more gung-ho tendency, then follow the previous method by pushing diagonally upwards and then centralise your sights, thus drawing the enemy

into the centre of the screen. The TIE fighters will attack in a certain sequence, ten to start with, and then two lots of five. Once the required amount of enemy crafts have been destroyed, aim your sights on the brown asteroid belt and then keep avoiding the oncoming rocks. Eventually you'll warp to hyperspace and on to the next level.

By exploring the higher platforms, Luke will stumble across numerous power-ups to assist him later on.

The second stage of Dagobah is pretty similar to the first. Take time to search every platform if you're eager to pick-up all the collectables. Your main aim is to locate Yoda, the frail Jedi master who will in time prove to be one of Luke's significant mentors.

## Dagobah 2-1

These wolf-like creatures are very persistent in their attack and take some finishing off. Try to force them back off the edge of the platforms.

When you come to the mushrooms, jump up to collect the force power-ups that are hovering above.

Keep jumping to avoid the many hostile creatures that lurk within the undergrowth.

Destroy these crates to uncover items such as grenades, energy hearts and guns.

A welcome sight to round off the level is the lovely Princess Leia kitted-out in her fetching winter gear!

## Rebel Base 3-3

Shoot upwards here for an extra energy heart and a handy Blaster power-up.

## AT-ST

This Scout Walker is one tough cookie to destroy. You must avoid his line of fire and aim at the small gun turret in the centre. Once that is destroyed, the vehicle will run and jump around a lot. Make your way over to the right-hand side of the screen, then turn around and blast away. Try chucking a few grenades at it as well.

Make your way up to this platform to obtain the Mind Control force power.

## Dagobah 1

Drop down into this corner to obtain the Elevation force power. This will come in handy for later on.

This Blaster power-up will come in very handy for vanquishing Dagobah's hostile inhabitants.

Artoo can be found to the far right of the level. Simply walk into the droid to complete the level.

Force power-ups aplenty on this level, simply Elevate up to this platform if you don't believe me!

## Dagobah 2-2

Look out for plenty of force power-ups around this vicinity.

Use your Elevation force to search the higher parts of this stage. Concealed behind the vines are various energy power-ups.

## Dagobah 3-1

The final part of Dagobah is no walk in the park. When you start, use your Elevation force to float up to a secret platform. Here you'll find loads of Force power-ups and extra abilities. This first stretch of this level consists mainly of tracks you've covered already, although things get quite interesting later on.

Drop into this pool to gain the Freeze ability and an extra heart.

Check under the water for extra bonuses that may be concealed there.

## Approaching Cloud City

This impressive 3-D level is very simple to complete, provided you don't go crazy and take risks. Your aim is to destroy the required amount of Cloud Cars – this can be done by using your normal guns, although taking them out with your proton torpedoes is less time consuming. Keep flipping between the clouds to confuse the enemy and try to collect the energy hearts that are jettisoned from each craft when they are destroyed. As you destroy more Cloud Cars, the distant Cloud City will slowly draw nearer. Once the required amount of enemies have been blown out of the skies, head towards Cloud City, maintaining a steady course to complete the level.

Having arrived at Bespin to find his old buddy, Lando Calrissian, Han realises that he's walked straight into an Imperial trap. This first stretch requires some nifty jumping and fancy gun skills to succeed. The best strategy is to kill everything that arrives on the screen rather than avoiding them. By doing this you'll keep a constant source of energy and earn blaster power-ups.

I would advise that you jump over these laser cannons as opposed to shooting them.

These ledges will start to lower when you stand on them. Keep jumping until they're at their peak, and then jump over to the next.

## Cloud City 1

At this point Han must really run the gauntlet of unstable platforms. Beware of the laser cannon waiting at the end because this could cause you to plummet to oblivion!

At last, back on stable ground again. Don't relax just yet though because far more dangers lurk ahead.

These strange plants cannot be destroyed, simply jump over them and avoid their spawn.

Collect these tokens for a massive points bonus.

More Bespin treachery afoot! Use the same tactics as before in order to gain ground. Check the map for hidden sections and power-ups, as you'll need them when facing the boss.

This lift can be tricky to catch, especially if 4-LOM has anything to do with it!

Time your move carefully, as this electric door can pose a lethal threat if it hits you.

## Cloud City 2

One of the ruthless bounty hunters known as 4-LOM will emerge from this door and pepper you with a barrage of bullets.

Take this route to gain extra energy and a blaster power-up.

This is where things get really tough. Despite running into the most ruthless and violent gang of bounty hunters in the galaxy, these corridors are littered with concealed cannons and unstoppable maintenance droids. Take time to explore.

Meet Bossk, another member of the mean bounty hunter syndicate. He will jump, shoot and run at you. Be aware that he takes several hits to destroy.

This is Zuckuss and he is one mean mother. Try to kill him before he activates his shield.

## Cloud City 3

There will be a Storm Trooper perched on this ledge, use a grenade to blow him away.

The first part of this section consists of riding Habogad's colossal spine. Use your elevation force to find the hidden platforms. When you reach Habogad himself, select the Heal force in case you need instant relief and then jump upwards, spinning your Light Sabre. The main danger area is its mouth so be sure to avoid at all costs.

Aim for the top half of the Habogad's head, concentrating on the eyes and nose. Occasionally it will snuff out what appear to be orange balls of hot snot; avoid these if you can! When the Habogad senses defeat, it will get irritated and start to sway across the screen, ducking and diving. Simply keep jumping over it and attack with your light sabre as you do so. In no time at all, it will give up the ghost!

## Boss

Make sure your blaster is reasonably powered-up before attempting to kill this boss. As the Tibanna Transporter follows you over to the side of the screen, roll under it and then turn and shoot. Try chucking a few grenades for added effect! There are seven main points to aim at, but try not to focus on just one, keep weakening them all so that the vehicle can be destroyed evenly. Once you've defeated the transporter, go right to meet Lando.

Shoot the creatures that emerge from these doors to fill your energy bar.

The final stretch of Cloud City is tough stuff, although it can be easily negotiated provided you've got a decent gun. At the end of this stage you'll encounter the menacing Tibanna Hover Transporter... don't ask me what it is but it sure is tough to defeat!

## Cloud City 4

Here is an extra life and energy that's up for grabs, it all comes in handy for later stages.

Drop down into this secret area to refill your energy bar and power-up your weapon.

The endless streams of mutants that emerge from these doors make it hard to scale the small platforms. When they appear, jump over them and push towards the wall to prevent being knocked off the edge.

## Ughnaught Factory 2

Keep jumping to avoid burning your toes in the lava, and avoid the hovering droids that pose little threat.

This steep slope is quite a trek, and to coin it all you're likely to be attack from all angles by hostile steel workers.

Although Chewie has immense strength, try to extend his life meter by shooting wave after wave of Ughnaught workers and then collect the health sword power-ups. The more energy you've got, the more chance you stand on the later sections.

## Carbon Freezing Chamber

The SUPER GAMER team are undoubtedly the world's best gamers and to prove it, we've found an exclusive secret room that has even been overlooked in the official *Empire*

*Strikes Back* cheat book! In the Carbon Freezing Chamber, follow the path until you reach a huge pit with a series of small platforms above. Now drop down the left-hand walk and

push inward at the bottom. Inside you'll be powered-up to the brains! To kill the boss, simply circle it by going up, then across and down whilst shooting the whole time.

The final battle starts here at the reactor. These levels are a doddle if you've come equipped with the full range of Force Powers. The simplest way to do this first part is to elevate onto the roof and go right.

## Reactor 1

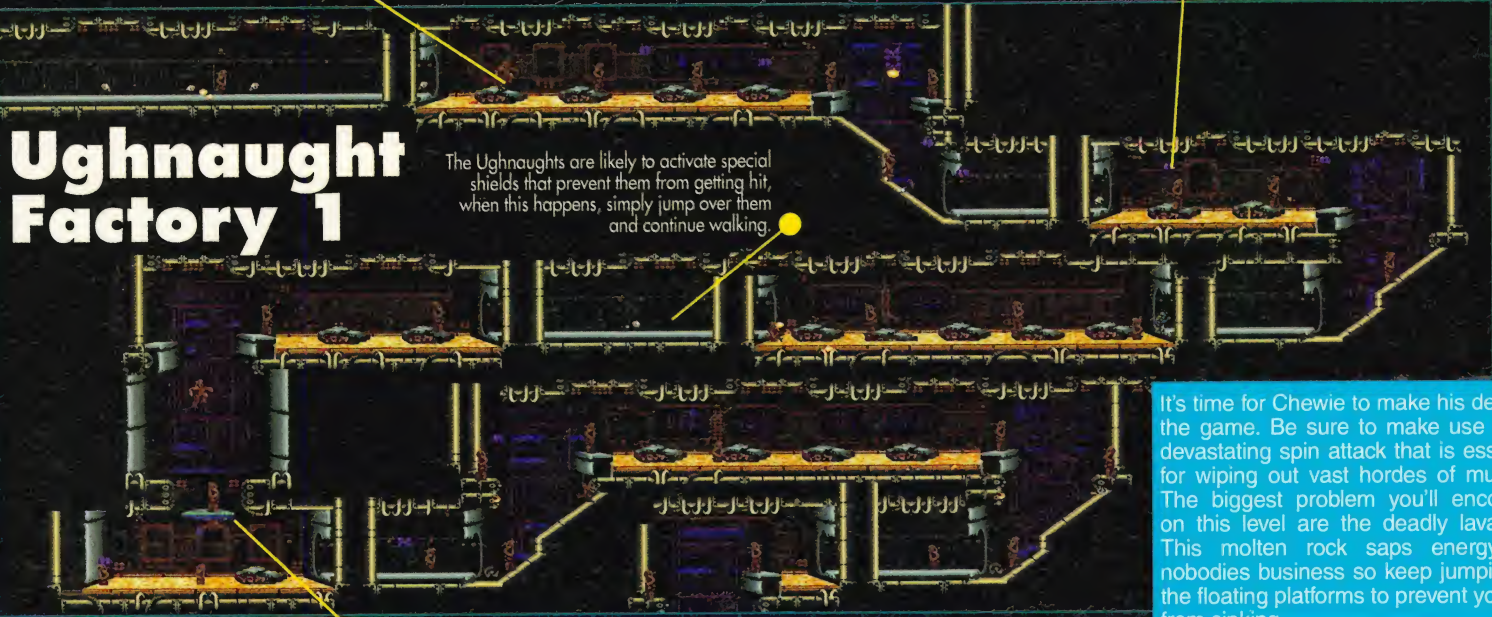

Don't waste any time crossing the lava pools, as one brief hesitation could end your chances of success.

Try to ignore these hovering droids if possible, as you're likely to risk your life falling into the lava if you attempt to shoot them.

# Ughnaught Factory 1

The Ughnaughts are likely to activate special shields that prevent them from getting hit, when this happens, simply jump over them and continue walking.

It's time for Chewie to make his debut in the game. Be sure to make use of his devastating spin attack that is essential for wiping out vast hordes of mutants. The biggest problem you'll encounter on this level are the deadly lava pits. This molten rock saps energy like nobodies business so keep jumping on the floating platforms to prevent yourself from sinking.

When descending on the lift, use the L and R buttons to view what is below you. This should prevent you from falling into the lava.

## Boss

The Ugharro Mining Crusher may look menacing, but don't fret because it's simple to defeat. As it sinks into the lava, shoot the pipes on the top; followed by the ones underneath when it hovers overhead. Eventually it will eject in a single pod which can be blow-away after a few hits!

Shoots the sides of the lift shaft to reveal extra energy hearts.

# Ughnaught Factory 3

The second part of the Ughnaught Factory consists of more lava-dodging mutant bashing! Try to conserve your energy for the final boss which isn't made easy by the fact that you have to confront it on sinking platforms. Remember the trick is to keep jumping.

If you like taking risks, shoot the three-way gun turrets on the ceiling.

Use this crane to get across the lava pit. Be careful not to let the annoying purple droids push you off!

Push down and fire to destroy these cannons. You'll deflect the beams back into it causing it to explode.

If you take the bottom route, be careful of falling Storm Troopers. They tend to drop down through the holes in their droves.

Stand on the end and observe the platform formation in preparation for the second part of the level.

Like before, the safest route to take is along the top of the corridor.

## Reactor 3

Once Darth has been vanquished temporarily, continue going right. Use the Heal force to restore any lost energy and be sure to kill as many foes as possible to restore your force meter.

The speeder bike-mounted Storm Troopers can pose a considerable threat. Stay stationary on the platform until you've destroyed them.

This is your first confrontation with Darth Vader. When he lunges at you, defend by pushing down and fire, then go in for the attack. He doesn't take much to banish for the time being!

This section can be tricky if you don't take time to observe what's above and below you. ONLY jump when the coast is clear to avoid falling to your doom.

## Reactor 2

Take time to destroy the laser cannons for more energy and occasionally the odd blaster-power-up.

To avoid heavy energy loss from these cannons, use your roll technique to whiz past them.

Take out the waves of red Storm Troopers to gain additional power-ups.

Dare you stand another battle with pops! tackle this the same way as before. Eventually the tight git with chuck you through the window, fatherly love eh!

Scale the platforms for various bonus items to replenish your energy for the long battle ahead.

## Reactor 4

### Bonus Stage

As Luke falls from the window, he'll drop down an immense pit filled with bonus items. Keep swaying from left to right to pick-up as many as possible. By the time you reach the bottom your score will have shot through the roof!

Get to this platform to gain lots of force and energy power-ups.

More hazardous platforms to scale, keep that elevation force enabled in the off chance that you accidentally topple over the edge.

Be sure to shoot down the waves of flying Storm Troopers, otherwise they'll accumulate and gang up on you!

Once again use the L and R buttons to scroll the screen up and down to see where the next platforms are.

The door to the right will take you on to the final battle with Darth Vader. Are you an accomplished enough Jedi to take him on?

The end is nigh, only one final stretch of hazardous terrain to overcome before the devastating climax with daddykins. This involves more platforms, nothing you can't handle!

## Reactor 5

## Darth Vader

Before you meet Darth, enable your Heal force. Once again keep alternating between attacking and defending. You'll know when you've gained the edge because the stinking cheat will result in summoning his force powers in order to hurl vast amounts of debris at you. Use your Light Sabre to brush them aside, some will even leave extra force power-ups behind.

### DRIVING

Life occasionally throws up choices, such as whether to take the car or the motorbike. This is the decision Dr Angelo must make when he reaches the highway. This section is a high speed horizontally scrolling sub-game where you must reach 'The Shop'. The motorbike is the one to take as it is highly manoeuvrable and can nip in and out of the traffic with ease. Avoid rolling barrels and try to pick up the side-firing missiles, these destroy vehicles on your flanks. Run over the arrows for a bit of turbo speed!

Once the highway has been successfully negotiated, the entrance to 'The Shop' will appear. This is the final building and lurking somewhere within its computer network is the Doomplayer; the ultimate artificial intelligence. To gain access to the building, the perilous cybertube must be completed first of all.

### Shop Entrance

Dr Angelo has just arrived on the scene in his 1974 Ford Station wagon. What style, what finesse, and what mug's going to fill those dents!

Once inside the shop there are many dangers to look out for. Soft drinks machine shoot change at you and chairs fly at you, poltergeist style. The enemies are much meaner now and some of them will take several shots to kill. Look out for the power-ups; there will be plenty hidden in pot plants.

Duck the high shots, jump the low shots and keep firing. That's the way to get past the soft drinks machine.

### The Shop

It's advisable to go along the top of this wall, as it is brimming with useful power-up and has fewer enemies than below.

These laser turrets beam a red hot light down in regular intervals. A few well-placed shots will wipe out this troublesome security system. Alternatively, just run past it.

Watch out for the chair, it may look like any normal chair, but once you get in close it will speed towards you. Jump over it.

## CYBERTUBE

This is the cybertube. It contains deadly obstacles which must be avoided while traveling at breakneck speeds. The control method is very sensitive at this point so small touches on the control pad will give you a better chance. Some objects can be shot away, while shooting others will only move them back slightly, so be prepared to move aside at the last second. Generally, it is advisable to keep shooting all the time, this means that you shouldn't suddenly come up against unwanted objects.

The action starts to hot up around this point so blast your way through and keep firing!

This small bushes are a saviour on this level. Most of them contain weapon power-ups which are to be cherished.

## COSMIC CITY

This has to be the most difficult of all the virtual zones. The gaps which must be steered through are very small and require a lot of practice. The best way to attempt this is by looking further ahead than the next wall and lining yourself up with the one beyond. Hopefully, this forward planning means that you won't be forever correcting your position, and it should be an easier ride.

Another very handy power-up here. Remember, don't go shooting any plants at home because you won't find any guns, and plants have feelings too, you know!

## The Shop 2

Don't forget to de-activate all the computers, otherwise you will not be able to complete the game, which would be a bit sad after coming this far.

This section of the shop features some nasty scientist-type people who appear with force fields protecting them. There is also a multitude of chairs to be avoided and some extremely hostile enemy activity along the corridors.

These guys appear again just to make life difficult. Keep on the left side and continue jumping or ducking to avoid the bullets.

These draws fly towards you, so as soon as you've killed the previous mini-boss be prepared to move quickly to avoid them.

These jet-packed propelled enemies appear very quickly. Try and avoid them by running back to the left as soon as they appear.

There is a hidden computer terminal behind this green wall. If you walk up to it, the information will show on your sensor.

The penultimate level of the shop throws everything at you. Take your time and meticulously annihilate everything. If you try and rush through it will be hard so stand and fight, there are enough power-ups around to do this.

## CYBEREGYPT

This level has a strange name, but looks great. It's relatively easy, though, for this late stage of the game and doesn't throw anything at you that you shouldn't be able to handle by now.

## The Shop 3

The surprising fact about this corridor is that there is barely anything here to actually harm you. In fact, it's a breeze!

Watch out for all the gunmen lurking behind the walls in this corridor. They won't pose too many problems, though.

## CYBEROFFICE

A hard level this but not the most difficult. Once again the trick is to look further ahead than the next set of obstacles. Don't go into the glass panels; they hurt!

This final section contains few enemies. The only thing you need to worry about is the impending battle with the Doomplayer. Walk to the end of the corridor before you enter the virtual zone as you will discover one last terminal.

This entrance to the virtual zone actually takes you to the final battle with the Doomplayer. Prepare yourself!

## The Shop 4

This is the very last computer! Be careful not to miss it as it appears after the entrance to the Doomplayer.

The key to destroying the Doomplayer is constant movement and continuous firing. Plenty of power-ups drift down from the top of the screen, some of them good, some of them bad. Try to pick up the ring weapon, as this covers the widest area.

**Q: How do you defeat Morton Koopa in *Super Mario World* on the Super NES?**  
Michael Brown, Gillingham.

**A:** Morton will charge at you when you are on the ground, so use the Y button to get faster sprints and leap over him every time he threatens you. Bounce on him when he stops. You must do this three times.

**Q: How do I get to the Misery Mire in *Zelda III* on the Super NES? I want to warp to the Light World and use the stone, but the only ones I can find are in the desert, and I cannot reach the ledge to use them.**  
Steven Voyle, Mid Glam.

**A:** If you blow your flute in the Light World, when the map screen appears, move left or right to get the number six to flash in the bottom corner. Press any button, then you will land on the ledge, pick up the rock that is on the right of you.

**Q: I can't find the dungeon sections on the second quest on *Zelda* for the NES.**  
Jamie Cooper, Scotland.

**A:** Here are the dungeon locations, Jamie.

**Q: How do you defeat the bird on level 7 of *Link's Awakening*?**  
Jayne Harris, London.

**A:** Keep your shield permanently activated. Stand in the middle and walk forward when the bird blows, so that you don't fall off the top. Just keep stabbing with the sword.

**Q: What happens when you collect ALL the gems in *Super NES Aladdin*?**  
F Piper, London.

**A:** If you collect all the gems, well done, but you won't get anything special for it, apart from more points and a better looking finish screen.

**Q: How do you defeat the last guardian in *Super Bomberman* on the Super NES?**  
Jamie Curtis, Harts.

**Q: I cannot beat the last boss on *Mickey Mouse* for the Game Boy, he just keeps teleporting all over the screen. Help!**  
Andy Withering, Milton Keynes.

**A:** The only way to kill the guardian is to grab the arrow at the top, drop down to the bottom platform, then shoot him when he isn't white. Use the other two arrows in the same way, but don't let him trap you in a corner.

# the write stuff

Again, console piracy is the number one issue that Nintendo gamers are raving about. What's wrong with it, why do people do it, does it mean the end of the games industry as we know it? Many people (far more than we could physically print) wrote in with their view on this controversial subject with their views. Remember, the Write Stuff is SUPER GAMER'S voice to the nation. If you want your views aired, start a campaign, or just complain about anything to do with Nintendo and owning a console, get pen to paper now and drop us a line. The address to write to is *The Write Stuff*, SUPER GAMER magazine, 124 Old Christchurch Road, Bournemouth, Dorset BH1 1NF. We want to know what you are thinking!

Well, what do I think of cart copying? The thing is, when I owned a home computer, copying was rife and almost accepted as a necessary evil. I used to fill countless C-90 tapes with games in order to have a collection of over 300 games, as did all my friends. We did not sell the games for personal gain, it was purely for personal consumption. I'm not saying this is a good thing to do, but there was method in our madness.

Every month, a group of five or six of us would save up our money and put it towards the latest game (in those days, games only cost £7.95!). When we got it home, we would all play it and then each one of the group would copy the game, and the person who bought it got to keep the original. This would alternate throughout the group until everyone had an original game and everyone was happy.

Now, I'm not saying that this is any better than ripping off the games direct, but what counts is that my friends would not have bought a copy of the game each, but they still have it, and can be impressed by the graphics, sound and playability

as if they had bought it. Many times I was so impressed by a company's previous game, that I used my turn to buy another of their games. Without the 'long term test' that I had through copying, this would not have been the case. Do you agree?

Let's face it, prices are far too high for everyone to actually buy all of their games, and our own surveys show that most console owners only buy two or three games a year. Think how many games are released a year - 30, 40? Surely this means that only the *creme de la creme* of games are bought and the market as a whole deflates. How can smaller companies survive when their entire future depends on one risky game? If Nintendo and Sega want to stop copying (as they claim they do), drop the prices and more people will buy games. Not hard is it? Tell us what you think?

Dear SG, I'm an average gamesplayer who spends weeks saving pocket money to buy the very latest and best games on the Super NES. I'm writing to your brill mag to share my views on the one thing that really annoys me - computer piracy.

While in my local games shop last week, I overheard a conversation between two lads talking about a device which enables game cartridge data to be transferred to disk, and how he had just received games (on disk!) that are not even out in the shops!

It annoys me to think that these people can pirate such games. Don't they realise that this could affect the games industry itself! I often read about game developers moaning about the price of making the games, Electronic Arts have already opted to abandon the Super NES market altogether because Nintendo are demanding a high price for developing games on their machine. Surely this could change if people stopped

pirating and actually bought original games. It would mean more money for Nintendo, then they could afford to lower their price for EA.

I understand that there will always be greedy, selfish people who want to own copies of brilliant games before anybody else has had the chance to play them, but forcing Nintendo to raise the prices will therefore stop great companies like EA producing top games for the Super NES.

Maybe when Nintendo release Project Reality they should keep everything CD based, because CDs are huge and it would take an awful lot of disks to copy them successfully; making it far too expensive for the idiots out there to pirate. James Savage, Liverpool.

*We seemed to have struck a raw nerve with this copying business, because everyone has an opinion on it. Rightly so, I say. You are quite right for saying that piracy is an idiot's game, but I hardly think that swelling Nintendo's huge coffers of cash is the right reason to get agitated.*

*Nintendo are, after all, making every third party publisher pay much more for their carts than they should, thus causing games like Lethal Enforcers and R-Type III to be more expensive than we would like. Funny how Nintendo's own games always seem to be £5-£10 cheaper than third party licences, and then they have the cheek to turn around and say that they are making an effort to reduce prices of their games!*

*The Monopolies and Mergers Commission are looking into cart prices, but it is not the actual prices that should be under investigation, it is the unfair higher cart prices charged by Nintendo to software publishers who are*

*forced to pay because otherwise they are not allowed to even bring out games on the Nintendo!*

Dear SG, I have recently purchased a Super Nintendo and I am not too sure about some things, so could you please answer some of my questions?

1. I have heard that some people are epileptic and can suffer from fits whilst playing Nintendo games. What is it in a game that does this?
  2. When will *Street Fighter III* be released and how much will it cost?
  3. In your magazine I have heard things like "Mode 7 and Sonics" being mentioned. Could you please explain what these are?
  4. Will there be any follow-ups to *Starwing* or *Alien 3*, and will there be any games like *Super Return of the Jedi*, or perhaps the new novels *Heir to the Empire* and *Dark Forces Rising*?
- David Stark, Fife

*Glad to help you David, try these for size.*

*1. Epilepsy has indeed been suggested by some American doctors to be induced by some flickering screens in video games, although this controversial topic has never been scientifically proved because it is impossible to recreate in test conditions. Some people may be more susceptible than others, indeed you may not even know you are an epileptic until it happens and there is no way to predict it. In any case, there is no proof that video games have ever, or will ever cause anyone to suffer an epileptic fit whilst playing on a console. If anyone has any information to the contrary, please contact me so that SUPER GAMER readers can be informed.*

2. *It's a bit too far off to start talking about Street Fighter III now, David; however, Capcom, the makers of Street Fighter II, have said that it will be a completely new approach, and not just a beat-'em-up, possibly a scrolling game like Final Fight.*

3. *Mode 7 is the graphical mode in the Super NES that allows scaling and rotation of objects and pictures, as used in Super Mario World and the overhead sections of Super Probotector. Sonics is just another word used by reviewers to describe the sound of a game.*

4. *There is already a Starwing 2 in production at the moment by ace programmers and developers of the Super FX chip, Argonaut, and rumours are that it contains a simultaneous two player option! No plans for a sequel to Alien 3 I'm afraid, but there will be a Super Return of the Jedi arriving before the end of the year from JVC. That's all the news on the Star Wars series, though.*

Dear SG,  
For the last ten years I've worked as a teacher at a secondary school for boys and, naturally during this period I've had the opportunity to study and reflect upon the many differing personalities of those who have come under my teaching.

Nowadays, I find that most of my pupils are enthusiastic about and regularly play console and computer games in their free time (and sometimes even manage to squeeze in a bit of homework!), and it is my considered opinion that despite some reports in today's media, physical violence perpetrated by young people is hardly ever video games related.

Of course, there is and always will be the odd maladjusted individual who commits an act of violence after playing video games, but that some person might well be disposed to violence after watching a film or reading a book.

I believe that rational people – young or old – are very much aware of the vast difference between reality and game playing.

I play on a Super NES and Mega Drive myself and readily confess to enjoying a good beat-'em-up, but this doesn't

make me a tyrant in class (though some of my cheekier pupils would disagree!).  
Ron Newton, Ashton-Under-Lyne.

*Glad to hear that thrashing some muscle-bound pimps or bad guy's lackeys in a game at home doesn't affect your life in class, Ron. I can just imagine you dragon-punching an unfortunate pupil for not getting his sums right, or trapping a school bully between two bombs in a Super Bomberman-esque nightmare (although that may be the solution to bullying!) to teach them a lesson.*

*Happily of course, you live in the real world, the same as me, where console players don't automatically become wild-eyed foaming at the mouth psychotic mass murderers when they plug in the latest beat-'em-up.*

*Console violence is highly over-exaggerated because it makes great headlines like "Street Fighter Blanka ate my mother!", or "Boy killed by Mario!" The media, especially the tabloids, love this sort of stuff because every hobby or craze gets the scare treatment at some time or another – it's a case of "hey, people are really into consoles, let's get some more readers by blowing it all out of all proportion". The real scandal of course is that gullible saps lap it up and really believe that console violence is happening in every home around the country.*

*You are quite right Ron, violence and consoles are not connected, at least not in the extreme ways that has prompted the new advisory ratings, but even I get frustrated when people beat me in two player games. However, this is just harmless competition (as long as I don't stab my opponent to death!) Thank you for your opinions, Jon.*

Dear SG,  
Please could you answer these questions about my Super NES?

1. What is the best football and platform game out?
2. Will *Eternal Champions* be coming out?
3. Is *Lethal Enforcers* any good?
4. Is *Desert Fighter* any good?

5. I heard that the price of computer games would be coming down, is it all a lie or will the price be coming down?

I think your magazine is excellent. I will buy every issue. Keep the good work up.  
Nik Askins, Warrington.

1. *If you really want to know who is King of the footy league, then wait until the next issue because we are compiling a massive football feature to go with a plethora of Super NES soccer reviews. There are an incredible nine games all coming out near the World Cup (June), including FIFA Soccer, Kick Off 3, WC Striker, Empire Soccer, Sensible Soccer, Super Goal 2, Ryan Giggs', Domark's football game (as yet untitled) and finally US Gold's soccer game. Only SUPER GAMER can tell you which are great, and which we hate.*

2. No

3. Yes, read our review on page 52 in issue one where I gave it 87%!

4. *A classic game if ever I saw one, Desert Fighter is reviewed in this issue.*

5. Definitely a lie.

Dear SG,  
Well done gang! An excellent debut. Informative as well as entertaining, and let's face it – the key word here is entertainment (and please take note Andrew Eley of Chelmsford, Write Stuff #1).

Now, I own just a Game Boy and have no intention of owning any other serious system. After a hard day's slog as a civil servant, I like to put my feet up two or three evenings a week, slip in a cart and prepare for a night's enjoyment.

Call me Mr Thick, but I don't seem to recall anything resembling 'cuteness' in *Alien 3*, *Super Hunchback*, or *Empire Strikes Back!* The whole world, his uncle and me found the two *Mario* games [and now there's *Warioland*] most amusing. *Krusty's Funhouse*, whilst including cute fluffy flying pigs, is one of the most challenging games ever marketed. Get my drift?

So, Mr Eley and your Turtle-scoffing mates, if you're all so mature that you find it necessary to zap around the universe playing cyberpunk, and seem to have nothing else

in your life – don't bemoan us simple people who just like to have fun!

OK, now the price factor. Look, be honest, I really have no objection to forking out £20-£30 for a cart that, if I treat myself to an occasional game (which is the true definition) that will last me up to six months – in the case of *Chessmaster*, the rest of my natural!

As for copying, I guess another name for it would be "enterprise." This has occurred with music cassettes since Noah was a kid, and I don't see Virgin UK moving to cardboard city! The guys who market games have always been well aware of copying in all its forms, and will either live with it, or employ somebody with enough savvy to eradicate it. Meanwhile, people are making a few bucks on the sly. Tough world, eh?

Anyway guys, more to the point, congratulations for a fine magazine. It entertained me and I sure won't mind shelling out £2.50 a month for that kind of quality.

Dave 'Krusty' Burchell, Welling

*Great to hear from a Game Boy owner in what seems to be a 16-bit world. We agree that Game Boy games can be just as playable (in fact more, in a lot of cases) than Super NES games, and this is why we place such a high importance on covering as many games as we can. By the way Dave, if you are interested, look in the next issue of SUPER GAMER for a full review of Monster Max, which I predict will be one of the greatest Game Boy games of all time. If you want challenge – this is it!*

*Back to business. Andrew Eley is perfectly entitled to hold the view that there are far too many cute games on the market, and I agree in part. It seems that the same old game clichés that have plagued games since the dawn of time, are now resurfacing again with the emergence of consoles. Rainbow Bell Adventure, for example, is a great game, but I never wanted to play it because it looked so damned 'nice'.*

*It is always very easy to pick out a few exceptions to the rule such as Alien 3, but be fair – there are far more yucky games out there than 'tough' ones. I do however agree that a good*

*game is a good game, no matter how it looks. The Mario series contain some of the most cheerful up-beat graphics of any game, but they are still recognised as the best platform games of all time. Playability is what's important, but all too often these days, first impressions last, and many great games are tarred with the same brush. 'Just another platform game' is no way to review a game – you have to look at its merits, and then decide.*

*I can see your point with the price, Dave, but Game Boy games are much cheaper and*

*the debate has never really concerned them. True, £25 is a lot to pay for a game that is in black and white, but people don't buy Game Boys for graphics, do they? What the fuss is really about is paying £75-£100 for games which are made for a fraction of the cost. If you are quite happy then fine, but the main problem occurs when third party companies, who want to lower the price for the good of the market, are not allowed because Nintendo and Sega keep the chip prices high. When you think about it, console games are a luxury item and so technically, the*

*companies can charge what they want. A Ferrari may only cost £30,000 to make, but they quite legitimately charge £75,000 because if you want one – you should be prepared to pay for it. If not, there are plenty of others who will.*

*The same ideology is being applied to console games and so there doesn't seem to be any way of forcing the prices down as long as the big companies keep their hands on their wallets, rather than concentrating on keeping their customers happy. The Nintendo helpline is a great gesture, but you have to be able to afford*

*the games to get stuck on them, right?*

*As for copying, no way, Dave. No piracy for personal gain is justified and it does affect the companies and games in the long run. The worst kind of pirate is the one who gets half-finished games from a modem and then sells them over here, or, as mentioned in Dale Miller's letter, the Ritz rental pirates. They may be making a few bucks on the sly, but it does affect every console owner in the country, and why should they profit from our misfortune?*

*We'd like to know what SUPER GAMER readers think?*

## STAR LETTER

Dear SG,  
I must congratulate you on a superb quality magazine, it is perfectly balanced with the correct amount of tips and reviews. The first issue has a lot to read and I am looking forward to the next issue.

I own a Super NES and also an Amiga 1200 and I hope that what is now happening to the Amiga isn't going to happen to the Super NES. I'm talking about the massive amount of pirating that is going on which has almost killed the Amiga market.

I know someone who has bought a Magicom [cart copying device] for his Super NES. He goes to places like Ritz, hires a game and copies it, then takes it back the next day and has a game for the price of the hire charge and a couple of disks! He also goes to this shop which deals in imported games and they actually copy the games for about £2. He has *Fatal Fury 2*, *Clayfighter* and tons of other games for just a couple of quid, while honest people like me have to fork out £40-£100 for one game – and to top it all, people are practically queuing up to lend him their games!

Now one of the worst things about this is if you call FAST [Federation Against Software Theft], you have to be ready to go to court as a witness for them, or they don't do anything about it, and so a lot of

people will be dissuaded from doing the right thing.

Now, if the prices of games were dropped to about £25-£30, a lot of people wouldn't mind buying many new games, but because the prices are so high, more and more Nintendo owners will buy Magicoms and Super Wild Cards.

On the subject of pricing, I think that Nintendo should start selling older games like *Mario World*, *F-Zero* and *Super Tennis* as budget games for about £15. If they did, they would sell more carts and also more hardware. I mean, what would you rather buy, a Sega Mega Drive at about £100 and games at about £20 a piece, or a Super NES with four games for the same price, but with some excellent old games at £15 a throw? And after a couple of months Sega will be finished and Nintendo will have a huge share of the video games market.

Dale Miller, Mid Glamorgan

*Many thanks for your comments on the magazine Dale, and what a breath of fresh air your views are. We at SUPER GAMER do not condone the use of cart copying devices such as the Magicom and Super Wild Card. Although it may seem very clever to con the software companies by not having to buy games, think about the effect that each deprived sale has on the UK market. Less sales mean companies think twice about producing games for that format and so, in the long term, gamers suffer. You can argue that copying games is a convoluted way of teaching Nintendo a lesson for high prices, but this will only mean even higher prices to cover the costs of lost sales.*

*Your friend is totally wrong, but I can see the problem with FAST is because software piracy is so widespread now that its resources are stretched to*

*breaking point. The best thing to do is remind your 'friend' that copying games like this is highly illegal and could result in huge fines if he/she is caught.*

*If you want another problem to consider Dale, how about the fact that many importers worldwide are using modems to take half finished copies of the latest games, as well as games waiting for Nintendo approval, and then selling them on disk to Magicom users for small amounts. This means that games far into the future are getting onto the market and the effect of the UK marketing around such games is reduced. Why would anyone be interested in *Mortal Kombat II* if the game had already been seen and distributed by unscrupulous software pirates?*

*As for cart prices – yes, you are of course right, and why Nintendo hasn't announced a budget range is a complete mystery, not to mention a silly mistake given Sega's similar scheme. They will probably fob us off that it would diminish the quality of the gold Nintendo seal, but this is of course nonsense. The simple fact is, and Nintendo I hope you are reading this, that if you reduce the prices of games, people would be less inclined to want advances like *Project Reality* (which always claims it would have cheaper games), and would be more likely to accept the humble Super NES for a long time to come. Games are far too expensive and as a result gamers nationwide are not buying as many games. This means fewer sales, less profit and Nintendo see this as a sign to get out of the 16-bit market – it's a vicious circle. A child could understand the logic, Nintendo – why can't you?*

*James Savage has more to say on this touchy subject, but for your comments, Dale, you get the Gamer Letter of the Month.*

# GALLERY

▷ This month's winner of the coveted SUPER GAMER T-shirt is a brace of Street Fighters by Liam Jones, somewhere in deepest West Yorkshire (top place). Good on ya, "Li"!

▷ More Jones family art! Can you keep up with them? Clockwise from right, we have Fred, Rachel and Kirsty. Next month: the Partridge family.

More artwork floods in, although some people still haven't quite got to grips with the name of the magazine. It's SUPER GAMER, not PRO! GAMER! GAMER! Got it? And enough of the blatant

copying of artwork, too! Do more original stuff, or next month will see the introduction of the 'Bin of Shame'. Send your art to Gallery, SUPER GAMER (GAMER! Got that?), 124 Old Christchurch Road, Bournemouth, Dorset BH1 1NF. And remember to put your name and address on the back!

▽ More Street Fighters, this time of the Super variety. Former SEGA X5 staff writer Jon "the H" Eves creeps onto the top left of Adam Fax's effort.

▽ These three karate kids obviously think that leeches are a good cure for jaundice. Put your name and address on next time, dummy!

▽ A nice Secret of Mana pic by Tom Bradley of Glasgow, which stands out by the simple virtue of not featuring any Street Fighters.

▽ What is it with over-muscled thugs on this page? Why aren't there more 'hot babes'? Eh, Richard Barker of Coulby Newham?

△ 'Debs' (who apparently fancies Mark Wynne) donated this toothy Mario.

▽ Street Fighter! Street Fighter! Everywhere I look, I see Street Fighter! Don't you know that Ridge Racer is the way of the future? Anyway, Ben Websdale from Leeds drew this on an envelope, then put in inside another envelope. Strange fellow.

**TAZ-MANIA**  
Looks good, but then looks aren't everything are they? A bit of playability would have gone down well.  
Overall 54%

**TALESPIN**  
Quite a tricky shoot-'em-up this. Features characters from the cartoon, but certainly won't appeal to younger players when it's this difficult.  
Overall 65%

**TENNIS**  
Buy this and you need not buy another tennis game. The two player link-up works superbly. Sheer brilliance.  
Overall 92%

**TETRIS**  
What can you say about this simple, yet possibly most addictive game ever to be made? Except that it astounds and astonishes every time.  
Overall 95%

**TINY TOONS**  
Superb platform game that features original bosses and smooth playability. Pure style.  
Overall 90%

**TITUS THE FOX**  
A rare thing to have a platform game with a link option. It is good on two player, but not on your own.  
Overall 65%

**TOP RANKING TENNIS**  
Offers a few more options than *Tennis*, but isn't as playable. Buy it if you can't get hold of *Tennis*.  
Overall 87%

**THE ADDAMS FAMILY**  
A considerably large platform adventure, that has nice graphics and plays pretty well to. Once you're into it, you won't be able to put it down.  
Overall 81%

**THE EMPIRE STRIKES BACK**  
Plays very well and the graphics are very good. Not quite as polished as *Star Wars* though.  
Overall 80%

**TMHT**  
The Turtles make their GB debut in this slick all action platform beat-'em-up. Fine graphics and playable, not bad for a bunch of green misfits!  
Overall 80%

**TMHT 2**  
More of the same, but even better. One of the rare sequels which has learnt from the original and used that knowledge to produce a better game.  
Overall 83%

**TRACK AND FIELD**  
Button bashing sport simulation which is good fun if you want to destroy your Game Boy in ten minutes flat.  
Overall 70%

**TRAX**  
Strange multi-directional shooter which is far too repetitive. What ever happened to variety and playability?  
Overall 37%

**UNIVERSAL SOLDIER**  
This platform game is an average, standard, dull, boring, pile of bolts. Just like Dolph Lungren.  
Overall 57%

**WARIO LAND**  
Nintendo does it again, now Wario plays the hero and Mario's nowhere to be seen, but it is still one of the best games for the Game Boy.  
Overall 91%

**WWF SUPERSTARS**  
Why wrestling games were ever deemed viable is a mystery to me. This uncontrollable mess of a game looks as appealing as Hulk Hogan's T-shirts.  
Overall 33%

**YOSHI'S COOKIE**  
Great fun on two player link-up. Very playable on your own too. A really good *Tetris* clone.  
Overall 78%

**ZELDA IV - LINK'S AWAKENING**  
Unanimously acclaimed as the best Game Boy game of all time. This vast adventure takes playability to the limit and the graphics are quite breathtaking. Buy now, or you go, go on!  
Overall 96%

**ZEN - INTERGALACTIC NINJA**  
Pretty good nothing new, but you'll like it until numbness sets in during the later levels.  
Overall 71%

**ZOO!**  
If you've seen one *Zoo!* - you've seen them all! Zany platform game which loses something now that it's in black and white. Still good, though.  
Overall 85%

## PROJECT REALITY

**STREET FIGHTER III**  
Apparently, right, according to a 17 page feature I saw in another mag, it's got a graphics mode that allows the characters to appear in your living room, like the holodeck from *Star Trek*, and you can actually be the bosses! Apparently. To tell the truth, nobody knows anything about Project Reality, not even Nintendo themselves, so any articles you've read about it are just bobbles. Except ours. Console yourself by looking through our magnificent A-Z for something to buy while you wait for the Next Big Thing. We've got the lot! (Probably.)
